1 Introduction	13
1.1 Research background	13
1.2 Research question	27
1.3 Preliminary methodological concerns	28
1.4 Research map and chapter contours	43

Section One: Thinking of space relationally: traveling epistemic frames and local context of knowing and doing

2 Conceptual elucidations	
The epistemic frames and causality in relational spatial theories in the European context	47
2.1 Introduction	47
2.2 The absolute-relational divergence and epistemic frames	49
2.3 Newtonian space and its implications for modern social theory	57
2.4 When relational space is re-inserted into the post-modern social science	62
2.5 Summary	80
3 Accounts of social space in traditional Chinese thought	83
3.1 Introduction	83
3.2 The scope of Chinese literature and abductive reconstruction	84
3.3 The social subject, self-hood and self-other relations	87
3.4 Things, names and truth-conditions	111
3.5 Summary	122
4 Recontextualizing theoretical knowledge of space and the local context of knowing	125

4.1	Introduction	125
4.2	The 'spatial turn' in Chinese academia	126
4.3	Spatial knowledge recontextualized and the social context of knowing	134
4.4	Revised social constructivism and relational spatial knowledge on the ground	148
4.5	Summary	151

Section Two: The retroductive empirical research on the spatial constitution of Beijing's artworld

5	Critical realism methodology and the study of an artworld	155
5.1	The polymorphic contemporary artworld in Beijing	155
5.2	Threefold research on Beijing's artworld under Critical Realist principles	157
5.3	Artworld as a space of political economy	164
5.4	Artworld as a space of everyday practices	191
5.5	The artworld in Caochangdi: a manifold analysis	217
6	Conclusion	251
6.1	Critical realism and compressed modernity studying space relationally with plural social-spatial theories	252
6.2	Thinking of space relationally in local context	255
