Introduction 7

HEINER FANGERAU & THORSTEN TRAPP

INTRACEREBRAL STEM CELL TRANSPLANTATION

Brain, Mind and Regenerative Medicine: Ethical Uncertainties and the Paradox of their Technical Fix 15

HEINER FANGERAU

Can Intracerebral Interventions Change our Self? – Neuroethical Implications of Ontological Assumptions 31

JOSEF QUITTERER

Parfit's Concept of Personal Identity and its Implications for Intercerebral Stem Cell Transplants 45

JAN GOLDSTEIN

Changes in Personality: Possible Hazards Arising from Stem Cell Grafts – An Ethical and Philosophical Approach 57

CHRISTIAN P. BÜHRLE

Establishing Regenerative Medicine for the Human Brain: Ethical Aspects of Intracerebral Stem Cell Transplantation 91

JENS CLAUSEN

Experimenting Innovative Cell Therapies for Parkinson's Disease: A View from Ethics 107

ALEX MAURON & SAMIA HURST

**Coping and Expectations of Patients with
Amyotrophic Lateral Sclerosis 123**

MIRJAM RUPP, PAULA BUDDE, HEINER FANGERAU,
MARTIN TEGENTHOFF & TORSTEN GREHL

DEEP BRAIN STIMULATION

Deep Brain Stimulation in Psychiatric Disorders 137

MAREKE ARENDS & HEINER FANGERAU

**The Essential Tension: On Ethical and Historical
Conundrums in the Trajectories of**

Deep Brain Stimulation 151

FRANK W. STAHNISCH

**Changes in Personality: Possible Hazards Arising from
Chronic Implantation of Electrostimulation Devices
such as Deep Brain Stimulation Systems (DBS) or**

Advanced Electronic Neuroprostheses 183

CHRISTIAN P. BÜHRLE

**Personality Changes through Deep Brain Stimulation
of the Subthalamic Nucleus in Parkinsonian Patients –**

An Ethical Discussion 223

SABINE MÜLLER

**Manipulating the Brain – An Ethical Challenge?
Lessons from Deep Brain Stimulation in**

Movement Disorders 251

THOMAS D. HÄLBIG

**Questions on Deep Brain Stimulation on Children and
Juveniles with Neuropsychiatric Disorders with**

Extremely Adverse Course 281

JÖRG M. FEGERT

Traditional vs. Modern Neuroenhancement:

Notes from a Medico-ethical and Societal Perspective 291
