

List of Tables

Table 1:	Overview of the study's independent variables	35
Table 2:	The study's intermediate variables: modes of coordination and additional categories of interaction	48
Table 3:	The study's dependent variables: performance assessment	58
Table 4:	Case study selection and its criteria	74
Table 5:	Overview of variables and their assessment scheme	86
Table 6:	Status of water bodies in the three WFD planning cycles (Guadalquivir)	126
Table 7:	Water supply in the Jucar River Basin District	133
Table 8:	Status of water bodies in the three WFD planning cycles (Jucar)	159
Table 9:	Water supply in the Andalusian Mediterranean Basins	165
Table 10:	Status of water bodies in the three WFD planning cycles (Mediterranean Basins)	192
Table 11:	Overview of patterns of interaction in each Action Situation in the case studies	195
Table 12:	Process and output performance at the level of Action Situations in the case studies	214
Table 13:	Process, output, and environmental outcome performance across Action Situations in the case studies	218
Table 14:	Agricultural water demand in inter- and intra-regional River Basin Districts to preselect case studies	267
Table 15:	Changes in agricultural water use in pre-selected River Basin Districts for final case study selection	268
Table 16:	List of interviews	269
