- 220 Rosi Braidotti, *The Posthuman* (Polity Press, 2013). An attempt to bring together Baudrillard and Deleuze, with an appreciation of both thinkers, yet within the framework of Marxist-based science fiction studies, is Sean McQueen, *Baudrillard and Deleuze: From Cyberpunk to Biopunk* (Edinburgh University Press, 2016). In his cognitive mapping of the stages of capitalism, McQueen sees Baudrillard as diagnosing the phase of cyber-capitalism which is challenged by the film-aesthetics of cyberpunk, and Deleuze as diagnosing the phase of bio-capitalism which is challenged by the film-aesthetics of biopunk. This approach of interpreting SF as the genre of "cognitive estrangement" under capitalism reduces SF to Marxism instead of contemplating what is original and autonomous about the science fiction worldview. Some major canonical works of the tradition of science fiction studies with which McQueen aligns himself are: Darko Suvin, *Metamorphoses of Science Fiction: On the Poetics and History of a Literary Genre*; Fredric Jameson, *The Geopolitical Aesthetic: Cinema and Space in the World System* (Indiana Univ. Press, 1992); and Carl Freedman, *Critical Theory and Science Fiction*.
