Increasing research activities 59
The extensive opening-up programme 60

Provisional evaluation of the effects of some development measures 67
The developments in the Manaus free trade zone 67
The results of the industrialisation policy 73
The expansion of large-scale livestock farming 76
The expansion of tropical tree and shrub crops 84
The development of forestry 85
The developments in the mining sector 86
The effect of the development measures discussed above. Summary 87
The danger of an increasing dependence on foreign countries 89
The criticism of the road building plans 90

The colonisation plans and the objections to them 93
The origin of the colonisation plans 93
The objections to the colonisation plans 94
Earlier colonisation activity in the Amazon region: government supervision 98
Conclusions: The reaction of the Brazilian government to the criticisms of its colonisation policy 102

The progress of the colonisation sponsored by the INCRA 105
The zone along the Cuiabá-Santarém highway 105
Landownership problems 109
Conclusion 114

The Altamira I Colonisation Project 115
The colonisation process 115
A provisional assessment 134
Conclusion 143

The plans for encouraging medium-sized farms 147

The development measures of the period from 1974 to 1976 149
The road building programme 149
Development of a modern, large-scale agriculture and forest exploitation 149
Development of mining 150
The role of large enterprises in the development of the primary sector 152
The government contribution to the development of the primary sector 152
The revised policy relating to colonisation projects 154
Conclusion 155

Conclusions. Looking back and looking ahead 159
Retrospect 159
The advantages for the South East 159
The advantages for the North East 160

https://doi.org/10.14361/9783839475362-toc https://www.inlibra.com/de/page/agb - Open Access - (cc) BY-SA

The dangers to the natural environment 164
The dangers for the Indigenous population 166
Conclusion 168

References 169

Part 3: Case studies from the early 1980s

Changes in population size and distribution during the 1970s 183
The development measures after 1960 183
Aim and framework of the analysis 186
Changes in the relative position of the Amazon region within Brazil 187
Explanation of the relatively feeble attractiveness of Amazônia Legal 189
Population increase per state or territory 191
Population changes at the meso- and micro-regional levels 195
Aspects of the urbanisation process 205
Conclusions 209
Statistical sources employed 211
References 211

The development of Altamira, before and after the construction of the Transamazônica 213
Ron Milder

Altamira up to the late 1960s 213
Altamira in 1970 216
Changes due to the construction of the Transamazônica 217
Polamazônia. Large scale and privatisation (1974–1980) 220
The rise of large-scale retail and wholesale trade 226
Transport and services 227
Government policy in the early 1980s 228
Modern extractivism and the alternative energy supply (1980–1984) 231
Altamira's altered functional structure (1980–1985) 233
To conclude 234
