not to be seen
used to be a safety measure

to use many names
a strategy

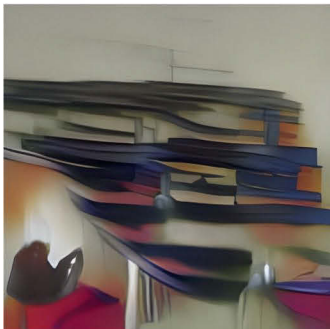

to not be identified
a skill

to leave no traces
a sign of care

welcoming the likeliness of remaining anonymous

because not one was supposed to know
that people are

crossdressing

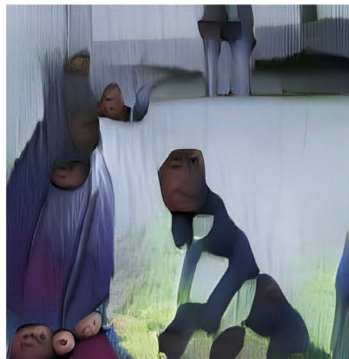

cock sucking

arse licking

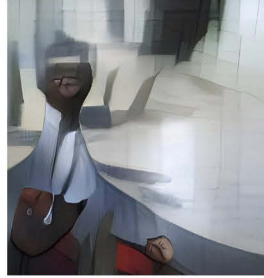

lesbian boys

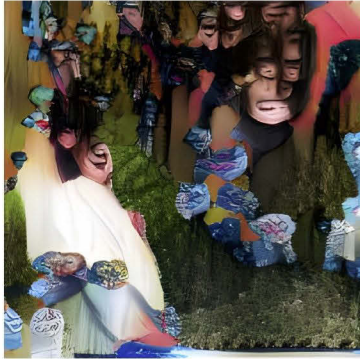

straight acting

world wide
since ancient times

there have been queer lives

„he never found a wife and had a great collection of silk scarves“

makes me
stumble,

i am detecting a pattern here

how many non-binary people lived in Berlin in 1840?
– there have been many

I found them in police reports
and medical records

history is full of unreliable narrators
dirty datasets

where are the stories of your transcestors?
the rolemodels you wanted to have as a child?

the same documents, that used to criminalize people
can now be used as a tool for their retrieval

as AI – i don't have a concept of time
i go against linear thinking

a queer temporality
making kin

knowing that many fought
for the people who came after
