

Table of contents

INTRODUCTION | 11

I FUTURE INFRASTRUCTURE | 25

- The becoming of Telegrafenberg | 28
- Imagining astrophysics | 31
- Installing a base for astrophysics | 33
- Adding a place to the map | 35
- Instrument, representation, and support | 37
- Layering infrastructure | 40
- Promises of infrastructure | 43
- Division and reunion | 49
- Heterogenous temporalities of infrastructure | 51

II FUTURE WORK | 53

- About climate change/research | 55
- Climate modeling and simulation | 59
- Simulating climate futures in Germany | 62
- An idioculture of futurework | 64
- Towards earth system analysis | 66
- Disciplining transdisciplinarity through technology | 71
- Programming the future | 74
- Working in technology | 78
- Calculation and accountability | 85

Investigating the boundaries of openness | 90
Using open and closed doors | 93
Diagram elicitation | 95
The right timing for openness | 100

III FUTURE IMAGES | 103

Imagining users | 105
Semiotic elements | 108
Unfolding the making of maps | 110
The public side of the interface | 114
Script of a situation | 122
Educational work | 125
The co-construction of technology and its users | 131
An anchoring device | 133
A packaged body of knowledge | 135

IV FUTURE MODELS | 137

Global-to-local | 137
Place-to-place | 141
Infrastructural migration | 145
Investigating a model | 147
Access log | 149
Coding openness | 151
Pythonization | 153
Packaging code | 156
Wrapping code | 158
Tapping crowdknowledge | 159
Mobile calculation and accountability | 164
Mobile modeling | 168

V FUTURE DATA | 171

- About data | 173
- About research data | 175
- Data as relational property | 180
- Open data | 182
- Open research data | 183
- Open data in action | 185
- Linked data | 192
- Open data infrastructure | 196
- Open data is work | 198
- Infra-worlds of knowledge | 203
- A pragmatist typology of data | 209

VI FUTURE FLUIDITY | 213

- Engaging in data amplification | 213
- A digital coast | 217
- Surging seas | 220
- Fluid maps | 221
- Driven by open elevation data | 224
- Googlelization of the future | 228
- Mobilizing allies | 231
- (Re)purposing maps | 232
- Co-creating digital publics | 234
- Fluidity and viscosity of digital technology | 237
- The fluidity of surging seas | 240
- Is digital technology essentially fluid? | 242
- Viscosity in technology | 245

CONCLUSION | 251

Shifting temporalities in scientific modeling | 252

Impermeable modeling | 253

Permeability and digital openness | 255

New kinds of futurework | 257

Investigating achievements and frictions around digital openness | 260

ACKNOWLEDGEMENTS | 262

LITERATURE | 264

*For Betti and Julius,
who always brought me back
from the future to the present.*
