Preface

This book compiles the findings from an international workshop that took place in the fall of 2022 at Friedrich-Alexander-University Erlangen-Nürnberg. The workshop and the resulting publication conclude a 7-year research project titled "Transnational Solidarity Conflicts," which was funded by the German Research Foundation (DFG). The project originally began as an investigation into solidarity conflicts in Europe during the Eurozone crisis, specifically examining the role of constitutional courts in addressing such conflicts. Throughout the project, we have observed an increase in solidarity conflicts within the EU and globally. These conflicts revolve around issues such as the distribution of resources in the context of migration, the pandemic, and climate change. In this final volume, we aim to assess how our conceptual approach to transnational solidarity conflicts can help understand and address the various solidarity conflicts that are prevalent in today's world.

We are grateful to the German Research Foundation for their ongoing support throughout the project and for generously extending the project duration due to the pandemic. Additionally, we would like to thank all workshop participants and the authors of this book for their contributions. Last, but not least, we would like to express our gratitude to our research assistants, Lisa Koller and Viola Berisha, for their tremendous support in finalizing the book.
