Introduction | 11

CLIMATE CHANGE ADAPTATION

The concept of climate change adaptation | 23

Climate change adaptation in the scientific debate | 23

Climate change adaptation in the agricultural sector | 29

The epistemological status of the adaptation concept | 35

The consequences of the epistemological stance for the political debate | 40

THEORETICAL STANCES

A mobile political agenda: adaptation to climate change | 45

Networks of mobile political agendas | 51

Actor-Network Theory | 53

Translating a mobile political agenda | 58

Actor-Network Theory and the Theory of Justification | 62

The Theory of Justification: Examination of actors' rationalities | 63

Methodological approach based on Actor-Network Theory and Justification Theory | 66

EMPIRICAL STUDY

South Korean environmental policy | 77

The emergence of environmental policy | 80

Environmental Reviews: Green Korea and Ecorea | 84

The Green Growth Strategy | 88

Korean Adaptation Center for Climate Change (KACCC) | 97

Projects and aims of KACCC | 101

Concepts of climate change adaptation | 103

The mobility of the adaptation agenda | 106

Problematization of climate change in South Korea | 115

Problematization according to sectors | 124

Beyond problematization: justifications for climate change adaptation | 126

Involvement of central governmental actors | 141

Central actors in agriculture: Rural Development

Administration | 147

New agricultural technologies | 153

Involvement of regional governmental actors | 161

Actors in Gangwon: Climate Change Research Institute | 161

Links between central and regional actors | 169

CCAIS: Climate Change Adaptation Information System | 170

The Agricultural Technology Center | 176

Distant mobilization of farmers | 183

Rural development and agricultural policy in Inje | 183

Problematization of weather and climate change | 188

Farming practices and limitations of coping | 190

Linking the national and local | 198

The top-down and bottom-up perspectives of climate change adaptation | 200

Continued way of traveling: Boosting adaptation | 203

International climate change workshops | 205

Boosting adaptation | 212

Bridging developing and developed countries | 215

SUMMARY AND OUTLOOK

Summary | 225

Reflections | 227

The future of Gangwon: scenarios for a rural province | 230
