Preface

The law of the European Union (EU) is now a major source of law in almost all regulatory areas. In the 21st century, maritime law – in particular the regulation of shipping – makes no exception anymore. Over the decades and largely driven by both the jurisprudence of the Court of Justice of the EU and the dynamic regulatory reaction to some disastrous shipping accidents in EU waters, EU maritime law has emerged to become an integral part of the EU’s internal market. This area of law has hardened and deepened to cover various aspects of competition law and transport law in general as well as various maritime-related safety and security issues. This development has occurred despite the important position of the International Maritime Organisation (IMO) as the world’s primary regulator for – in the words of the IMO itself – “*safe, secure and efficient shipping on clean oceans*”.

Though being a member of the United Nations Convention on the Law of the Sea (UNCLOS) the EU is still not a member of the IMO in its own rights. However, all EU member States are active members and participants in all IMO matters. Their individual position as sovereign IMO members is carefully coordinated in Brussels – under active leadership of the European Commission – mostly resulting in a common policy position of the “EU block” at the IMO in London. There are even some recent examples of IMO legal acts being identified as incompatible with EU law, thus resulting in new legal conflicts between those two regulators. Generally, EU maritime law now covers a wide array of both public law and even private law aspects of shipping as well. It is inextricably interlinked with the work of the IMO and, ultimately, both regulators cannot globally succeed without the other. Even the EU’s regional rules for the regulation of international shipping affect the rest of the world, for example, by introducing stricter regional environmental standards to be adhered to both by EU-flagged vessels and non-EU flags when entering EU waters and, in particular, EU ports.

The rise of EU maritime law as a separate source of law is also the result of shipping being one of the key factors for economic growth and prosperity throughout Europe’s history. About half of the EU’s population lives less than 50 km from the sea. Waterborne freight transport has proved to be a vital instrument for the development of the EU’s trade whether national, intra-EU or external. Today, the maritime industry is an important source of revenues and jobs in Europe. But there are also dangers and risks inherent to maritime transport. The EU’s reliance on maritime transport means that it is as surrounded and penetrated by the risk of pollution from shipping, both chronic and catastrophic, as it is by the sea itself. The words of the European Commission are both true in a positive and in a negative way: “*Maritime transport has a direct impact on the quality of life of citizens.*” As a result, the EU has the strongest interests in

- promoting safe, secure and efficient intra-European and international shipping on clean oceans and seas,
- assuring the long-term competitiveness of European shipping and related maritime industries in world markets, and
- assisting the entire seaborne transport system to adapt to the challenges of the 21st century.

This Commentary strives to be a reference work for everyone seeking to know more about how EU 21st century maritime law affects commercial practices and even the rights of consumers (for example as passengers of vessels) and everyone else (for example via the prescription of strict environmental standards for shipping). We have chosen to divide the book into five chapters, acknowledging that not every regulatory area of maritime law and not every single legal act can be analysed as intensely and as detailed as the provisions of a single comprehensive convention could be commented on. Thus, Chapter 1 introduces the overall regulatory framework for maritime transport in the EU. Above all, Chapter 1 serves as a legal and historic foundation for all following specific chapters. It also includes some information on issues like infrastructure, system development and integration, including port policy, and the EU's maritime-related external relations, which are cross-cutting topics not addressed specifically elsewhere in the Commentary. Furthermore, Chapter 1 also contains a separate summary on the regulation of inland waterway transport in the EU. As stated in Chapter 1, it is possible to break down the maritime policy of the EU into some core areas, most importantly

- seafarers' recruitment, training and working conditions,
- market access and conditions for offering maritime transport services,
- maritime safety and pollution control;
- maritime security.

This list of leading topics governs the following structure of the Commentary: At the outset, Chapter 2 addresses further cross-cutting issues which – under the current status of EU law and international law – are difficult to comment on via sole reference to specific statutes and provisions. Still in a “non-commentary style”, this chapter addresses the general role of EU regulatory activity for carriage of goods by sea contracts as well as conflict of laws and jurisdictional issues in the maritime context. The final topic of Chapter 2 – cross-cutting questions of EU law and international maritime labour law – is also directly interlinked with possible conflicts of laws.

After that, Chapter 3 discusses the most important EU legal instruments to create a liberalised and competitive market in maritime services, arguably the most important and most traditional challenge related to intra-EU matters. Two of the six sub-chapters in Chapter 3 also address the difficult modern issue of passenger rights, generally when travelling by sea and on inland waterways and particularly, in the event of accidents possibly triggering certain liability claims.

Arguably, Chapter 4 (adding up to not less than 14 sub-chapters) forms both the heart and backbone of this Brussels Commentary. It is centred on the ever-

growing subject of the protection of the marine environment and the related acts of EU maritime safety law. The majority of the sub-chapters of Chapter 4 comment on EU Regulations and Directives which are part of the so-called “*Erika packages*”, a series of legislative acts adopted in the aftermath of the “*Erika*” oil tanker casualty which occurred in 1999 off the coast of France. Another maritime disaster in EU waters, the break-up of the oil tanker “*Prestige*” in late 2002, has fuelled the follow-up dynamics of the “*Erika packages*” even more. Six of the 14 sub-chapters are directly linked to the “*Erika III package*”, the latest (2005-2009) and most important “wave” of EU legislative activity in this field.

In an effort to also address one of the latest legislative acts within the context of Chapter 4, a basic commentary on the EU’s new Regulation on the monitoring, reporting and verification (MRV) of carbon dioxide emissions from shipping and its future practical implications concludes the discussion of the various environmentally-related sub-areas. Some critical readers might miss an individual commentary on the legislative acts paving the way for the most important establishment of the Lisbon-situated European Maritime Safety Agency (EMSA) in 2002. However, the EMSA and its continuously widening tasks – especially in support of the European Commission in monitoring the implementation of all legal acts discussed in Chapter 4 – are addressed in the various specific *rationae materiae* of almost all other sub-chapters. In sum, it seemed appropriate to us to refrain from commenting on the intra-EU provisions on the configuration and finance of the EMSA itself.

Chapter 5 concludes the Commentary by addressing the globally important challenges of security, in particular in relation to maritime transport and port infrastructure. This represents a topic which has gained the most practical prominence in the aftermath of the terrorist attacks of 11 September 2001.

Reviewing all specific regulatory topics addressed and all sub-chapters chosen for inclusion in the Commentary, there would still be a list of possible further themes and acts. Some of them are cross-cutting with other subject-matters like, e.g., waste management, as addressed by the relevant EU Regulation on ship-recycling, adopted in 2013 and implemented over the next years. Nevertheless, we think that the choice of topics and the relevant EU legal acts commented on is brought down to a sound and round figure. Additionally, the professional qualities of all authors involved should make the Commentary an essential reading to students, researchers, academics and practitioners. It is the result of arduous work involving many setbacks and shifted deadlines. However, in the end, this new Commentary shall still contribute to making a partly impenetrable, protracted and dynamic area of law more accessible to readers throughout the whole world.

Henning Jessen
Hamburg, December 2015

Table of Contents

List of Authors	XIII
Abbreviations	XV
Chapter 1: General Introduction: The Regulatory Framework for Maritime Transport in the European Union	1
I. Maritime Transportation	1
<i>Robert Coleman/Henning Jessen</i>	
II. EU Law and Inland Waterway Transportation	48
<i>Henning Jessen</i>	
Chapter 2: Fundamentals and Cross-Cutting Topics of Maritime Law and EU Regulation	77
I. The EU and the Carriage of Goods by Sea under Private Law and EU Regulation	77
<i>Melis Özdel</i>	
II. Maritime Conflict of Laws and Jurisdiction	193
<i>Melis Özdel</i>	
III. Seafarers’ Rights and Maritime Employment Contracts in the EU Legal Order ..	231
<i>Henning Jessen/Alexander Block</i>	
Chapter 3: Developing a Liberalised and Competitive EU Market for Maritime Transport	275
I. Introduction	275
<i>Robert Coleman/Henning Jessen</i>	
II. Commentary on Regulation EEC/3577/92/EC Applying the Principle of Freedom to Provide Services to Maritime Transport within Member States	298
<i>Marian Paschke</i>	
III. Application of EU Competition Rules to Maritime Sector – Commentary on the Liner Shipping Consortium Block Exemption Regulation No. 697/2014 (Regulation 906/2009)	322
<i>Michael Jürgen Werner</i>	
IV. Commentary on the Community Guidelines on State Aid to Maritime Transport and Regulation 3094/95 on Aid to Shipbuilding	342
<i>Michael Jürgen Werner</i>	
V. Regulation (EC) No 789/2004 on the transfer of cargo and passenger ships between registers within the Community	371
<i>Timo Noftz</i>	
VI. Commentary on Regulation EC/1177/2010 Concerning the Rights of Passengers when Travelling by Sea and Inland Waterway	390
<i>Christine Wersel</i>	

Table of Contents

VII. Regulation (EC) No 392/2009 of the European Parliament and of the Council of 23 April 2009 on the liability of carriers of passengers by sea in the event of accidents	473
<i>Antonios Politis</i>	
Chapter 4: EU Maritime Safety and Pollution Control	566
I. Introduction	566
<i>Robert Coleman/Henning Jessen</i>	
II. Commentary on Directive 1999/32/EC as regards the sulphur content of marine fuels, as amended by Directive 2012/33/EC	589
<i>Orestis Schinas</i>	
III. Commentary on Directive 2000/59/EC of 27 November 2000 on Port Reception Facilities for Ship-Generated Waste and Cargo Residues	635
<i>Thomas Brinkmann</i>	
IV. Commentary on Directive 2001/96/EC Establishing Harmonised Requirements and Procedures for the Safe Loading and Unloading of Bulk Carriers	646
<i>Michael Pimm</i>	
V. Commentary on Regulation EC/782/2003 on the Prohibition of Organotin Compounds on Ships	649
<i>Orestis Schinas</i>	
VI. Commentary on Directive 2005/35/EC on ship-source pollution and on the introduction of penalties, including criminal penalties, for pollution offences (as amended by Directive 2009/123/EC)	667
<i>Henning Jessen</i>	
VII. Commentary on Regulation EC/391/2009 on Common Rules and Standards for Ship Inspection and Survey Organisations and Directive 2009/15/EC on Common Rules and Standards for Ship Inspection and Survey Organisations and for the Relevant Activities of Maritime Administrations	713
<i>Henning Jessen</i>	
VIII. Commentary on Directive 2009/16/EC of the European Parliament and of the Council of 23 April 2009 on Port State Control	856
<i>Michael Pimm</i>	
IX. Directive 2002/59/EC establishing a Community vessel traffic monitoring and information system and repealing Council Directive 93/75/EEC	902
<i>Michael Jürgen Werner</i>	
X. Commentary on Directive 2009/18/EC Establishing the Fundamental Principles Governing the Investigation of Accidents in the Maritime Transport Sector	937
<i>Sara Vatankhah</i>	
XI. Commentary on Directive 2009/20/EC on the Insurance of Shipowners for Maritime Claims	1015
<i>Michael Pimm</i>	
XII. Commentary on Directive 2009/21/EC on Compliance with Flag State Requirements	1023
<i>Michael Pimm</i>	
XIII. Commentary on Regulation 530/2012/EU of Double-Hull or Equivalent Design Requirements for Single-Hull Oil Tankers	1034
<i>Henning Jessen</i>	

Table of Contents

XIV. Commentary on Regulation (EU) 2015/757 on the Monitoring, Reporting and Verification of Carbon Dioxide Emissions from Maritime Transport	1060
<i>Henning Jessen</i>	
Chapter 5: Security of Maritime Transport and EU Port Infrastructure	1099
I. Introduction	1099
<i>Robert Coleman/Henning Jessen</i>	
II. Commentary on Regulation EC/725/2004 on Enhancing Ship and Port Facility Security	1112
<i>Alexandros Ntovas</i>	
III. Commentary on Directive 2005/65/EC on Enhancing Port Security	1191
<i>Mateusz Bek</i>
