

## Index of Tables

Table 1	Food-related technological subclasses of IPC according to NACE	34
Table 2	Biotechnology-related technological subclasses of IPC according to NACE	36
Table 3	Food-related German patent applications with priority from 1970 to 2001	39
Table 4	Food biotechnology-related German patent applications with a priority from 1970 to 2001	45
Table 5	Food-related Brazilian, Chinese and Indian patent applications with priority from 1990 to 2001	76
Table 6	Food biotechnology-related Brazilian, Chinese, and Indian patent applications with priority from 1990 to 2001	78
Table 7	Nestlé's food-related German, Brazilian, Chinese, and Indian patent applications with priority in 1990-2001	87
Table 8	Nestlé's food biotechnology-related German, Brazilian, Chinese, and Indian patent applications with priority in 1990-2001	88
Table 9	Applications of biotechnology in the production of plant-derived agricultural raw materials	94
Table 10	Fields of biotechnological research related to the production of animal-derived agricultural raw materials	100
Table 11	Uses of enzymes in the production of processed food	103
Table 12	Areas of human physiology that are relevant to functional food	107
