

Contributors

Regula Valérie Burri is a professor in Science and Technology Studies at HCU Hamburg and a member of the Cluster of Excellence *Matters of Activity. Image Space Material* at Humboldt University Berlin. Her research areas include (visual) knowledge, science and art, and cultures and the governance of science and technology.

Igor Dalla Vecchia is a geographer and is currently a PhD candidate in Urban and Regional Planning at UFRJ (Brazil), with a co-tutelle in Geography at MLU (Germany). His research focuses on the production of urban space on digital platforms through labor.

Juliette Davret (Dr.) is a postdoctoral researcher on the *Data Stories* project at Maynooth University Social Sciences Institute. Her research areas include critical data studies, digital geographies, and science and technology studies.

Johanna Fischer, sociologist, is a graduate student at HCU Hamburg and a researcher in the BMFTR-funded project *LiquidInfo* at Leipzig University's computing center. Her research addresses software production, ML and data science, innovation labs, GIS and digital urban twins, technographies, and grounded theory.

Hanna Göbel is professor for Methods of Urban Practice at HCU Hamburg. Her research focuses on the intersection of urban studies, body and cultural theory, assemblage urbanism, and ethnographic knowledge productions.

Mascha Gugganig (Dr.) is a senior lecturer and co-director of the Center for Life Science and Society at the Faculty of Biology, Ludwig-Maximilians University of Munich. She is a socio-cultural anthropologist, science and technology studies scholar, and curator for research exhibitions on contested technologies in agrifood and beyond.

Danielle Hynes (Dr.) is a postdoctoral researcher on the *Data Stories* project at Maynooth University Social Sciences Institute. Her research areas include urban studies, critical data studies, and media and cultural studies.

Timo Kaerlein (Dr.) is Akademischer Rat (senior lecturer) at Ruhr University of Bochum. His research areas include the theory, aesthetics, and history of interfaces, mobile media and wearables, and practices of urban sensing.

Rob Kitchin is a professor in the Maynooth University Social Sciences Institute and Department of Geography. He is the principal investigator of the ERC-funded project, *Data Stories: Telling stories about and with planning and property data*. His research areas include digital geographies, smart cities, planning, and critical data studies.

Michael Krell is a research associate at the Chair of Human Geography at Dresden University of Technology. His research focuses on the political geographies of different far-right actors in Germany.

Sophia Leipert is a doctoral researcher in the Research Training Group *Fixing Futures* at Goethe University Frankfurt. Her research interests include logistics, automation, labor, and digital socio-technical configurations. She works at the intersection of urban studies, economic geography, and science and technology studies.

Jason Luger (Dr.) is an assistant professor in Human Geography at Northumbria University, Newcastle. His research areas include urban space, urban politics, and urban cultures. In particular, he explores how illiberalism relates to urban life, identities, and spaces, both offline and online.

Boris Michel is professor for Digital Geography at Martin-Luther University Halle-Wittenberg. His research areas include urban geography, critical cartography, and the politics of (geo)data.

Fabian Namberger (Dr.) is a research associate at HCU Hamburg and a member of the DFG's Research Training Group *Urban future-making: Professional agency across time and scale*. His research tackles the nexus of urban political economy and digitalization with a focus on AI, data work, and autonomous driving.

Inga Reimers (Dr.) is a research associate in the BMEL-funded project, *NEON (Sustainability on Demand)* at the University of Regensburg. Her research areas include commensality, futures of work, rural areas, ethnographic methodology, and (non-consensual) collaboration.

Zita Seichter is an urban researcher working at the intersection of social and cultural geography and urban planning. She has also been a fellow in the Research Training Group *Urban future-making* at HCU Hamburg since 2025. Her work focuses on spatial future imaginaries, regressive territorializations, and tech-urbanism.

Ronja Trischler (Dr.) is a senior lecturer in Sociology of Science and Technology at TU Dortmund University. Her research and teaching focus on the cooperative production and repair of technology, media, and culture (e.g., film and app production), theories of practice, and qualitative methods.

Sebastian Wucherer is a graduate student at HCU Hamburg, where he investigates visions and imaginations of digital futures – from utopias to dystopias – as tools that shape societal orders. His research focuses on political and economic actors, such as big tech companies and members of parliament.
