Bibliography of 10 Years International Society for Knowledge Organization

Compiled by Dr. Gerhard J.A. Riesthuis; with assistance of Dr. Winfried Schmitz-Esser

INTRODUCTION: On the 22nd of July, 1989, the International Society for Knowledge Organization (ISKO) was founded. Starting in August 1989 ISKO had an official organ, the journal *International Classification*. This journal was founded in 1974 by Dr. Ingetraut Dahlberg, the first President of the ISKO. With volume 20 (1993) the name of the journal was changed to *Knowledge Organization*. This bibliography has been compiled on the occasion of the second decade of ISKO.

This bibliography indexes the content of *International Classification* and *Knowledge Organization* starting with *International Classification* volume 16(1989) issue 3 and ending with *Knowledge Organization* volume 26(1999) issue 3. All articles and all book reviews are included. From the news items, only those for which an author is mentioned and that were especially written for *International Classification* or *Knowledge Organization*, are entered in this bibliography.
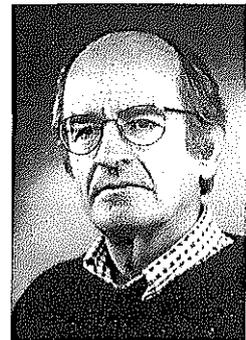

The bibliography also contains the papers of conferences organized by the International Society for Knowledge Organization, one of its national chapters, or sponsored by the ISKO or one of its chapters. If we overlooked a conference of which the papers should have been included, we apologize for this omission. A list of the conferences included can be found in the list of abbreviations.

The bibliography is based on the literature that was available to the compilers. However, not all conference proceedings included in the bibliography could be found in sources available to us. In these cases descriptions from the bibliographies in *International Classification* and *Knowledge Organization* were used. For a few proceedings the help of national chapters was sought and obtained. They deserve our thanks.

The bibliography is ordered according to the classification used for the current bibliography in *Knowledge Organization*. The complete classification – as it is used now – is published in this issue of *Knowledge Organization*. The bibliography also includes an *Author Index*.

We want to add that this bibliography is more complete than the bibliographies in *International Classification* and *Knowledge Organization*.

We hope that you will find this bibliography useful and timely.
