

Contents

| | |
|---|-----|
| List of Abbreviations | 7 |
| List of Figures | 9 |
| 1. Introduction | 11 |
| 2. Some preliminary remarks | 21 |
| 2.1 Epistemic challenges of highly complex systems | 21 |
| 2.2 Discovery and justification: the DJ distinction | 29 |
| 2.3 A few words about objectivity | 35 |
| 3. Three ideals of science | 39 |
| 3.1 Value-free science | 39 |
| 3.1.1 Introduction: values in science | 39 |
| 3.1.2 Inductive risks and social values | 50 |
| 3.1.3 Social values in climate science | 57 |
| 3.1.4 Conclusion | 74 |
| 3.2 Model, theory and observation | 79 |
| 3.2.1 Introduction: from handmaiden to a life of their own | 79 |
| 3.2.2 Theory-ladenness, underdetermination and models of data | 85 |
| 3.2.3 Observations in climate science | 92 |
| 3.2.4 Conclusion | 108 |
| 3.3 Predictability | 113 |
| 3.3.1 Introduction: predictability and uncertainty | 113 |
| 3.3.2 Robustness | 118 |
| 3.3.3 Uncertainties in climate science | 124 |
| 3.3.4 Conclusion | 145 |

| | | |
|-----------|--|------------|
| 3.4 | Looking back and a tentative look forward | 147 |
| 3.4.1 | Complexity and understanding | 148 |
| 3.4.2 | Discovery and justification | 150 |
| 3.4.3 | Scientific objectivity | 154 |
| 3.4.4 | Conclusion: what now? | 156 |
| 4. | Tacit knowledge, skill and expertise | 159 |
| 4.1 | Tacit knowledge | 162 |
| 4.1.1 | Michael Polanyi: tacit knowledge | 162 |
| 4.1.2 | Gilbert Ryle: knowing how and knowing that | 165 |
| 4.1.3 | Harry Collins: a taxonomy of tacit knowledge | 166 |
| 4.2 | Tacit knowledge in climate science | 174 |
| 4.2.1 | Connection between tacit knowledge and expertise | 179 |
| 4.2.2 | Climate modelling as engineering or craft | 184 |
| 4.3 | Conclusion: expertise through experience | 187 |
| 2. | Concluding remarks | 195 |
| 5.1 | Where to go from here? | 196 |
| 5.1.1 | Philosophy of science | 197 |
| 5.1.2 | Science | 199 |
| 5.1.3 | Public | 201 |
| | References | 203 |
| | Acknowledgment | 227 |
