WEALTH AND THE ECOLOGICAL TRANSFORMATION

Interdisciplinary Perspectives
on Reciprocal Dynamics

[transcript] New Economies

Judith Terstriepe, Stefan Gärtner (eds.)
Wealth and the Ecological Transformation

Editorial

Our current economic systems are not geared towards the satisfaction of needs and the care for our environment and our fellow human beings, but solely towards growth and profit. The consequences of this are a constant reproduction of social inequalities along the axes of class, *race* and gender as well as the isolation of individuals and the destruction of nature.

The **New Economy** book series provides explanations for these multiple crises of our time and opens up possibilities for a sustainable, solidarity-based economy. It provides an editorial space for heterodox empirical research, paving the way for pluralistic, interdisciplinary and self-reflexive economics.

Judith Terstriep (Dr. rer. pol.) is Head of the Research Department 'Innovation, Space & Culture' at the Institute for Work and Technology at Westfälische Hochschule Gelsenkirchen and a lecturer at Ruhr-Universität Bochum. She has extensive experience in innovation research. Her primary research interests focus on the interplay of innovation, social relations, and knowledge from the perspectives of innovation studies, management, and spatial theory, contributing to just transitions and societal change.

Stefan Gärtner (Prof. Dr.) is managing director of the Institute for Work and Technology at Westfälische Hochschule Gelsenkirchen. There, he is responsible for the research focus Spatial Capital. His academic work concentrates on urban and regional economies as well as on forms of urban production. He completed both his studies and his doctorate at Technische Universität Dortmund.

Contents

Introduction—Navigating the Wealth-Ecology Nexus
Benedikt Pühmeyer, Inga Seiffert, Judith Terstriep & Stefan Gärtner7

Part I—Diagnosis & Context

From Regional Cohesion and Structural Policy to Just Transition and Transformative Change?
A growing Lack of Conceptual Clarity
Stefan Gärtner & Judith Terstriep 21

Ecologizing the Concept of Progress
Toward a Terrestrial Ethics and Ontology through Jonas and Latour
Marlen Reinschke..... 55

Affluence and consumption of natural resources
Lessons from the Global Resources Outlook 2024 about the drivers behind the Great Acceleration
Philipp Schepelmann 85

Part II—Challenging the Status Quo

Infrastructures as Catalysts for Ecological Transformation
Christian Hein 113

Carbon Pricing in Practice

Interdisciplinary Insights to Improve the Effectiveness of CO₂ Pricing

Michelle Alferts & Elias-Johannes Schmitt 151

The Ecological Price of Inequality

How Wealth Disparities Shape Sustainable Development

Michelle Alferts 183

Individual-Level Predictors of Climate Misinformation Susceptibility

Marvin Fendt, Fabian Reinwarth and Peter Adriaan Edelsbrunner 217

Part III—Reimagining Transformation

Who owns the present, owns the future?

Rethinking socio-ecological transformations through infrastructure ownership

Carlotta Terhorst 251

Qualitative Scenarios for supporting regional public foresight

Insights from practical student projects

Elias-Johannes Schmitt 269

Beyond profits

An exploration of energy commoning practices in local energy communities

Hannah Charlotte Müller 297
