# WEALTH AND THE ECOLOGICAL TRANSFORMATION

Interdisciplinary Perspectives  
on Reciprocal Dynamics

**[transcript]** New Economies

Judith Terstriepe, Stefan Gärtner (eds.)  
Wealth and the Ecological Transformation

## Editorial

Our current economic systems are not geared towards the satisfaction of needs and the care for our environment and our fellow human beings, but solely towards growth and profit. The consequences of this are a constant reproduction of social inequalities along the axes of class, *race* and gender as well as the isolation of individuals and the destruction of nature.

The **New Economy** book series provides explanations for these multiple crises of our time and opens up possibilities for a sustainable, solidarity-based economy. It provides an editorial space for heterodox empirical research, paving the way for pluralistic, interdisciplinary and self-reflexive economics.

**Judith Terstriep** (Dr. rer. pol.) is Head of the Research Department 'Innovation, Space & Culture' at the Institute for Work and Technology at Westfälische Hochschule Gelsenkirchen and a lecturer at Ruhr-Universität Bochum. She has extensive experience in innovation research. Her primary research interests focus on the interplay of innovation, social relations, and knowledge from the perspectives of innovation studies, management, and spatial theory, contributing to just transitions and societal change.

**Stefan Gärtner** (Prof. Dr.) is managing director of the Institute for Work and Technology at Westfälische Hochschule Gelsenkirchen. There, he is responsible for the research focus Spatial Capital. His academic work concentrates on urban and regional economies as well as on forms of urban production. He completed both his studies and his doctorate at Technische Universität Dortmund.
