Lifewide Learning in Postdigital Societies

Studies in Digital Interculturality

Editorial

As cultural boundaries blur and virtual and physical spaces merge, interculturality and digitalization mould our everyday world. We believe these entangled concepts should be viewed together. Our interdisciplinary book series is dedicated to the idea of a scholarly Intercultural Communication, informed by the perspectives of critical Digital and Internet Studies: **Studies in Digital Interculturality**. In this series we wish to publish thematically relevant monographs, anthologies, dissertations, and edited volumes of the highest quality.

The series is edited by Luisa Conti, Fergal Lenehan, Roman Lietz and Milene Mendes de Oliveira.

Luisa Conti (PD Dr.) is a researcher at Friedrich-Schiller-Universität Jena, Germany, as well as P.I. in the EU-project “KIDS4ALL: Key Inclusive Development Strategies for Lifelong Learning” and “ReDICO: Researching Digital Interculturality Co-operatively”. The chief pillars of her interdisciplinary research are education, communication and cultural studies. Her focus is on the factors and dynamics which foster or hinder social cohesion, with digitality being therefore a central aspect of her field of research.

Fergal Lenehan (PD Dr.) is P.I. and researcher at the research co-operative “ReDICO: Researching Digital Interculturality Co-operatively”. He has written extensively on the intellectual history of the European idea, Irish-German relations and histories and theories of the Internet. His research focuses on theoretical linkages between postdigitality, intercultural communication and cosmopolitanism.
