This handbook is a product of the ACCESS network of scholars from universities in Africa and Germany. ACCESS is short for African Centre for Career Enhancement & Skills Support, and its activities include a combination of research, staff development, and skills and entrepreneurship training support for students at African universities. The key partners in ACCESS are the University of Addis Ababa, Ethiopia; the University of Ibadan, Nigeria; INES-Ruhengeri, Rwanda; IRGIB-Africa University, Republic of Benin; Kwame Nkrumah University of Science and Technology, Kumasi, Ghana; Leipzig University, Germany; Mount Kenya University, Thika, Kenya; and Université de Tunis, Tunisia. A further 30 universities in African countries are integrated into the ACCESS network through the key partners. ACCESS has been funded since January 2020 by the German Federal Ministry for Economic Cooperation and Development through the DAAD EXCEED “Excellence Centers for Exchange and Development” scheme. We thank the Ministry and the DAAD for their continued support. We also thank the current and former members of the ACCESS team in Leipzig, as well as ACCESS Board Members and coordinators, for keeping the project on track. We also thank the university administrations that made it possible for us to collaborate, as well as the academic colleagues and students who participated in our workshops, conferences and summer schools online and in person in Abuja, Leipzig, Hammamet and Tunis. We particularly acknowledge our past and current ACCESS PhD students and postdocs for their role in developing our employability research agenda. Some of the chapters in this book have been written by our former PhD students, while our current PhD students have contributed to the volume through their critical feedback.
