

CONTRIBUTORS

This publication is a result of many discussions held with neighborhood residents, students who participated in the workshops, and children from surrounding schools. We received valuable input from professionals who guided us through the district and support from both the district and the Tbilisi city administration. In addition to the authors, all members of the research project contributed their knowledge to the publication through professional exchange. Olga Savytska, Nadiia Dmytryk, and Oryna Tokar from the Odessa State Academy of Civil Engineering and Architecture deserve special mention for their valuable feedback and dedicated efforts.

The drawings used throughout this book were designed, edited, and refined by all the authors of this publication. However, special thanks go to student assistants David Kapanadze, Jasmin Maichle, Aleksandre Okrostsvaridze, Gvantsa Tkemaladze, Sophie Weiss and Lucas Zirn for their work, passion, expertise, and persistent drawing.
