Proceedings of the 5th TREC-conference held in Gaithersburg, Maryland (USA), November 20-22, 1996. Aim of the

conference was discussion on retrieval techniques for large test collection. Different research groups used different techniques, such as automatic thesauri, term weighting, natural language techniques, relevance feedback and advanced pattern matching, for information retrieval from the same large database. This procedure makes it possible to compare the results. The proceedings includes papers, tables of the system results, and brief system descriptions including timing and storage information.

Founded in 1798 in Berlin, the publishing house Duncker & Humblot now celebrates its 200th anniversary and looks back at a bicentennial tradition of scientific literature. Starting as first publication with the "Athenaeum" – the programmatic journal of the romantic movement – the publishing house's main emphasis has changed

during the course of time: from philosophy and the arts to mainly law, economics, social science and history/politics.

As a result of a meticulous research into Duncker & Humblot's ancient catalogs and archives, this bibliography tells the reader a multifaceted story and has certainly a number of discoveries in stock. In addition, a richly illustrated brief history of the past 200 years of the publishing house completes this fascinating piece of cultural history.
