List of Abbreviations	9
1. Introduction	11
1.1. Worlds apart in a transnational biomedical landscape	13
1.2. Background	14
1.3. Aim and research question	18
1.4. Theoretical implications	21
1.5. Outline of the book	28
2. Methodological Musings	33
2.1. Introduction	33
2.2. (Rethinking) the field: The US, the UK and Nigeria; or where is this research “local”?	34
2.3. An overview of the sample and fieldwork periods	42
2.4. Ethnographic research and the challenges of studying “up, down or sideways”	51
2.5. (Critically) analyzing data	57
2.6. Conclusion	60
3. The Emerging Nigerian Biomedical Landscape and Trajectories of Becoming a Doctor	63
3.1. Introduction	63
3.2. Biomedicine in Nigeria: An emerging landscape	65
3.3. Becoming a doctor: Professional trajectories in Nigeria	73
3.3.1. A question of class and regional origin? Who takes the medical path and why	73
3.3.2. Life as a medical student in Nigeria	79
3.3.3. Studying and working in times of austerity: Embodying medicine under political and economic constraints	86
3.3.4. Moving to the hospital setting: Frictions between medical imaginaries and clinical realities	89
3.4. Practicing medicine in Nigeria: Trajectories in the face of moral dilemmas	95
3.5. Conclusion	105

4. Going Global	107
4.1. Introduction	107
4.2. Beyond push and pull: Frictions and connectivities in skilled migration	109
4.3. Migration regimes in the US and the UK and 'migratory cultural capital'	112
4.4. Three cases: Transnational biographies at and of work	122
4.4.1. Dr. Erioluwa: A pioneer of transnational Nigerian physicians	123
4.4.2. Mr. Akomolafe: Leaving in the 1990s for the UK	132
4.4.3. Dr. Banjoko: Migration in the new millennium	142
4.5. Differentiating super-diverse skilled migration: Frictions and connectivities in the (re)configuration of identities	150
4.5.1. Super-diversity in migration	150
4.5.2. Changing identities in transnational professional spaces	151
4.6. Conclusion	159
5. Female Nigerian Physicians	161
5.1. Introduction	161
5.2. Out of sight, but not in the margins: Gender in highly skilled migration	163
5.3. Being a female physician in Nigeria	167
5.4. The diverse influence of gender on female physician migration: Three cases	170
5.4.1. Dr. Odara	171
5.4.2. Dr. Adaeze	175
5.4.3. Dr. Ebuka	182
5.5. Combining work and family responsibilities	187
5.6. Discrimination in gendered physician migration	190
5.6.1. The gendered experience of discrimination in and outside the clinic	191
5.6.2. "If you're both, it's a lot": Double discrimination and professional identity	195
5.7. Conclusion	196
6. Practicing in a Transnational Biomedical Landscape	199
6.1. Introduction	199
6.2. Biomedicines as local cultural systems of knowledge and practice	201
6.3. Disconnecting from and connecting to local biomedical contexts: physicians' perceptions	204
6.4. Adapting to biomedicine in the 'global North'	206
6.4.1. Adapting to structural differences	206
6.4.2. Cultural adaptations to the social side of practicing biomedicine	214
6.5. Lost in translation: Variations in medical language	229
6.6. State-of-the-art or the art of medicine? Clinical skills and differing understandings of what medicine is	238
6.7. Practicing defensive and wasteful medicine	248
6.8. Conclusion	251
7. Between Moral Dilemmas and Logistics	255
7.1. Introduction	255
7.2. Therapy management networks and transnational care across biomedical landscapes	257
7.3. Moral dilemmas: Migrating doctors' double role in transnational therapy networks	260

7.4.	The routine and logistics of caring for relatives back home.....	264
7.5.	Transnational care in times of crisis.....	279
7.5.1.	The case of Dr. Chukwu's father: A broken hip and a transnational search for immediate and adequate care.....	281
7.5.2.	The case of Dr. Emeka's mother: Medical travel and the remorse of (im)mobility	283
7.5.3.	The case of Dr. Dike's brother: Stroke and diverging perceptions of treatment	288
7.6.	Connecting the sites and variations of care: (medical) remittances in transnational medicoscapes.....	292
7.7.	Conclusion.....	295
8.	Giving Back	297
8.1.	Introduction.....	297
8.2.	Voluntourism among migrated medical professionals and medical remittances as a transformation and projectification of health care provision	300
8.3.	"Making bridges" through geoprofessional organizations	306
8.4.	Making sense of medical missions: Layers of connectivities in temporarily overlapping local biomedical landscapes	317
8.4.1.	Two versions of a mission day.....	318
8.4.2.	Medical missions attached to home associations: Dr. Chijoke's and Dr. Osinachi's experiences.....	323
8.4.3.	Dis/connectivity in a transnational biomedical landscape of medical missions	327
8.5.	"Assuaging guilt" or "engineering change"? Physicians' viewpoints on the transformative agency of joint and individual efforts to give back.....	329
8.6.	Sustainable change: Skill transfer as a lesson learned from medical missions.....	339
8.6.1.	Dr. Adisa's case: Remitting pathology knowledge through (virtual) workshops	342
8.6.2.	Dr. Adanna's case: Attempting to transform pain management	343
8.6.3.	Skill transfer – a means to transform the local biomedical landscape?	344
8.7.	Skill transfer to the private sector: a chance for change or for profit?.....	346
8.8.	Conclusion.....	350
9.	Conclusion	353
	Bibliography	363
	Acknowledgements	397
