REMEMBERING FUTURE DISASTERS

Temporal Ecologies in the Peruvian Andes

Tomás Usón
Remembering Future Disasters

Editorial

The series **EnvironmentalAnthropology** publishes studies that are based on ethnographic methods, reflect emic perspectives and contribute to environmental theory building. The series is based on a broad concept of the environment, which includes both the social, human-made and the “natural” environment. With this broad thematic scope, the series maps the diversity of culturally specific lifeworlds and practices worldwide. The series also aims at bringing together ethnological studies with an environmental focus and to promoting dialogue within interdisciplinary and international debates. In this way, the writings published in **EnvironmentalAnthropology** make unique contributions to pressing environmental issues of the present day.

The series is edited by Eveline Dürr, Frank Heidemann, Oliver D. Liebig and Martin Sökefeld.

Tomás Usón is a geographer and anthropologist from Santiago, Chile. His research examines the temporalities of disasters, ecological degradation and socioecological justice, drawing on approaches from science and technology studies and multispecies research. He completed his doctorate at the Institute of European Ethnology and the Integrative Research Institute on Transformations of Human-Environment Systems at Humboldt-Universität zu Berlin in 2023, and works as a postdoctoral researcher at the Institute of Geography of the same university.
