# Contents page

Vol.19(1992)No.1

**Satija, M.P.: Ranganathan and classification: A chronology 1924-1992.**

Int.Classif.19(1992)No.1, p. 3-6

Based on a number of sources given in the introduction the dates of Ranganathan's development in the field of library classification are given together with a short description of their impact and significance. The chronology which has been structured according to some periods of his life determined mostly by location lists also the relevant publications of Ranganathan and mentions some post mortem events. (I.C.)

**Xiao, Yan: Modern development of classification. Research & practice in the People's Republic of China.**  
Int.Classif. 19(1992)No.1, p.10-14, 32 refs.

A review and prospect of modern classification research and practice in the PR China. Gives a systematic description of the evolution in methodology, scope and orientation of classification research, with special emphasis being put on the influence of Colon Classification (CC) and the principle of facet analysis and synthesis established by Dr.S.R.Ranganathan as well as on the achievements made by Chinese scholars and experts in designing classification schemes. (Author)

**Sukiasyan E.: The ideas of S.R.Ranganathan in Russia: results and tendencies.**

Int.Classif. 19(1992)No.1, p.7-9, 5 refs.

Survey of studies made in Russia during the past 45 years concerning the work of S.R.Ranganathan, especially with regard to his classification terminology, the chain procedure and the categorial analysis for the application in the alphabetic subject index and the classified catalog. It is also shown how the knowledge of facetization was used in improving the UDC and the LBC tables as well as in automated information retrieval.

(Author)

**Iyer, Hemalata: Subject representation and entropy.**  
Int.Classif. 19(1992)No.1, p.15-18, 14 refs.

The paper examines the systems approach to subject structuring. It presents an overview of empirical studies undertaken to test the postulates relating to subject structuring. Entropy provides a measure of disorganization in a system. Structured subject representations are considered as systems and the measure of entropy is applied to determine the extent of distortion in the communication of the intended messages.

## Scope

The more scientific data are generated in the impetuous present times, the more ordering energy needs to be expended to control these data in a retrievable fashion. With the abundance of knowledge now available the questions of new solutions to the ordering problem and thus of improved classification systems, methods and procedures have acquired unforeseen significance. For many years now they have been in the focus of interest of information scientists the world over.

Until recently, the special literature relevant to classification was published in piecemeal fashion, scattered over the numerous technical journals serving the experts of the various fields, such as

philosophy and science of science  
science policy and science organization  
mathematics, statistics, and computer science  
library and information science  
archivistics and museology  
journalism and communication science  
industrial products and commodity science  
terminology, lexicography and linguistics

Beginning 1974, INTERNATIONAL CLASSIFICATION has been serving as a common platform for the discussion of both theoretical background questions and practical application problems in many areas of concern. In each issue experts from many countries comment on questions of an adequate structuring and construction of ordering systems and on the problems of their use in opening the information contents of new literature, of data collections and survey, of tabular works and of other objects of scientific interest. Their contributions have been concerned with

- (1) clarifying the theoretical foundations (general ordering theory, science theoretical bases of classification, data analysis and reduction)
- (2) describing practical operations connected with numerical taxonomy/ classification, as well as applications of classification systems and thesauri, manual and machine indexing
- (3) tracing the history of classification knowledge and methodology
- (4) discussing questions of education and training in classification
- (5) concerning themselves with the problems of terminology in general and with respect to special fields.

## Instructions for Authors

*Manuscripts* may be submitted in either English, German or French to the editor-in-chief in two sets (the original and one copy) typed in double space, comprising between 1500 to 3000 words. They should be accompanied by an English indicative abstract of 100-200 words. The contributions are refereed.

*Criteria for acceptance* will be appropriateness to the field of the journal (see Scope and Aims) taking into account the merit of the content and its presentation. Papers are accepted with the understanding that they have not been published, submitted or accepted for publication elsewhere and that, if the work received official sponsorship, it has been duly released for publication. Authors will usually be notified within 6 to 10 weeks. Unless specifically requested, manuscripts or illustrations will not be returned.

*The text of the contributions* should be structured by subheadings; it should contain (a) an introduction, stating the purpose, (b) a description of materials and methods in sufficient detail, (c) information on results or systems developed, and (d) a conclusion on and/or summarization.

*References* should be listed at the end of the paper with the numbers in brackets referring to such numbers in brackets within the text part.

*Additional notes* should be indicated in the text by listed single numbers behind a word and equally collected with their texts at the end of the paper under the heading *Notes*.

*Journal References* should contain the names and initials of all authors, full titles of the publication, abbreviation of the

## Aims

Thus, INTERNATIONAL CLASSIFICATION is meant to be a programme for the improvement of classification methods and processes, a forum for discussion for all those interested in the organization of knowledge on a universal or a subject-field scale, using concept analytical and/or concept-synthetic approaches as well as numerical procedures and comprising also the intellectual and automatic compilation and use of classification systems and thesauri in all fields of knowledge, with special attention being given to the problems of terminology.

INTERNATIONAL CLASSIFICATION publishes original articles, reports on conferences and similar communications, the Newsletters of the International Society for Knowledge Organization (ISKO News) and the Committee on Classification Research of the International Federation for Information and Documentation (FID/CR News) as well as book reviews, letters to the editor, and an extensive annotated bibliography of recent classification and indexing literature, covering now some 500 items in each issue.

INTERNATIONAL CLASSIFICATION should therefore be available at every university and research library of every country, at every information center, at colleges and schools of library and information science, in the hands of everybody interested in the fields mentioned above and thus also at every office for updating information on any topic related to the problems of order in our information-flooded times.

INTERNATIONAL CLASSIFICATION was founded in 1973 by an international group of scholars with a consulting board of editors representing the world's regions, the special classification fields, and the subject areas involved. From 1974-1980 IC was published by K.G.Saur Verlag, München. Back issues of 1978-1990 are available from INDEKS Verlag, too. (The 10 volumes of 1978-1987 are offered now at the highly reduced price of DM 350.-).

As of 1989, INTERNATIONAL CLASSIFICATION has become the official organ of the INTERNATIONAL SOCIETY FOR KNOWLEDGE ORGANIZATION (ISKO) and is included for every ISKO-member, personal or institutional in the membership fee (DM 50.-/DM100.-).

*Rates:* From 1990 on for 4 issues/ann. (including indexes) DM 97.- + postage (DM 6.-). For air mail delivery add DM 4.- per issue. Membership rates see above. - INDEKS Verlag, Woogstr. 36a, D-6000 Frankfurt 50.

journal according to the ISO Standard 4, volume number, year of publication in brackets, issue number and first and last page numbers. *Monograph References* should give the name(s) of the author(s), full title, edition, place of publication, publisher, year and the number of pages.

*Examples:* Mater, E.: Human intelligence as a precondition for the machine processing of knowledge. Int. Classif. 15(1988) No. 3, p. 125-132

Hunter, E.J.: Classification made simple. Aldershot, GB: Gower 1988. 115p.

*Illustrations* should be restricted to the necessary minimum. *Graphs and diagrams* should be supplied as black and white drawings suitable to reproduction. *Half-tone illustrations* should be sharp, well-contrasted glossy prints. Illustrations should be numbered lightly with a soft pencil on the back. Numbered legends should be attached on a separate sheet.

*Tables* should be typed double-spaced on a separate sheet, contain a number and a title at the top and be cited in the text. Each column should have a heading.

Authors shall receive 25 *reprints* of their papers free of charge. Additional reprints may be ordered.

*Corrections in galle proof* exceeding 10% of the typesetting costs will be charged to the author.

*Contributions on micro flexible discs* are welcome if delivered in DOS compatible standard software such as Word (DOS or Windows), WordStar, Word Perfect, Euroscript, Multimate, In\*a\*vision, DCA/RFT-files or plain ASCII code - our standard is Word (Windows) and Pagemaker.
