Andrea zur Nieden (eds.)  
The Order of People

**Science Studies**

**Nils Ellebrecht** works as a sociologist at the University of Freiburg and the University Hospital Freiburg in Germany. His work focuses on the sociology of organization, technology, security, and medicine.

**Tino Plümecke** is a sociologist at the University of Freiburg, Germany. His work centers on science and technology studies, theories of discrimination, and critical race studies with a particular emphasis on the history and contemporary developments in genetics and (post)genomics.

**Isabelle Bartram** is a molecular biologist and works at the Institute of Sociology at the University of Freiburg, Germany. She is interested in interdisciplinary perspectives on biomedical research and questions surrounding responsible use and governance of human genetics.

**Veronika Lipphardt** is a professor of science and technology studies at the University College Freiburg, Germany. She has worked on the history of the life sciences in the 20th century, particularly on the history of physical anthropology and human population genetics in their political, social, and cultural contexts. Recently, her research has focused on forensic DNA analysis and population genetic studies of vulnerable populations.

**Jenny Reardon** is a professor of sociology and the founding director of the Science and Justice Research Center at the University of California, Santa Cruz. Her research draws into focus questions about identity, justice, and democracy that are often silently embedded in scientific ideas and practices, particularly in modern genomic research. She has been the recipient of fellowships and awards from, among others, the National Science Foundation, the Max Planck Institute, the Humboldt Foundation, and the Freiburg Institute for Advanced Studies.

**Andrea zur Nieden** is a sociologist at the University of Freiburg, Germany. Her research operates in the field of science and technology studies resp. sociology of technology, medicine and science, with a recent focus on human diversity in the new life sciences as part of the research group SoSciBio. She has also worked on the sociology and history of psychiatry.
