B. FORM AND SUBJECT INDEX

(The arrangement in this index follows the outline given for Classification Literature in Int.Classif.9(1982)No.2,p.109. It contains the titles in abbreviated form. The indication of type of source is added, namely A for Article, R for Report, E for Editorial, F for FID/CR News, C for COCTA News, I for Infoterm News, O for Obituary, L for Letter to the Editor and B for Book review. All the non-English titles are given in translated form with language symbols for the original (de = German, fr = French, and it = Italian).

INTERNATIONAL CLASSIFICATION AND INDEXING BIBLIOGRAPHY
VOL.I:
CLASSIFICATION SYSTEMS AND THESAURI 1950-1982. ICIB 1
160 pages, DIN A4, DM 48.80
ISBN 3-88672-300-3
FID-Publ.610

This comprehensive bibliography of all universal and special classification systems and thesauri which could be found in the literature as well as in libraries, listing some 2300 titles from the time 1950-1982, is the first volume to appear of a series of probably four volumes covering the classification literature.

ICIB 1 consists of two parts: Part I covers the general classification systems, with all their editions in different languages and in different subject fields, such as the Universal Decimal Classification (UDC); the Dewey Decimal Classification (DDC); the Library of Congress Classification (LCC); the Bliss Classification; the new Soviet system, Library-Bibliographical Classification (BBK); the International Patent Classification (IPC) and many other general classification systems, thesauri and subject headings lists.

Part II covers special classification systems and thesauri, arranged according to the subject fields of the new universal system for the classification and arrangement of subject fields called Information Coding Classification (ICC) - see also the article in International Classification 9(1982)No.2, p.87-93.

References to all special editions of universal classification systems (of their full editions as well as of their separately published ones) have been included in the subject sections of Pt.II in order that these may also be considered when checking on what is available in a certain subject field.

The volume has an author index and a subject index as well as concordances between the UDC and the ICC.
