Remarks

1. The course of the enemy vessels is based on comprehensive assumptions derived from observations from various directions.
2. The locations where the enemy vessels had sunk were confirmed by data and by large correct by the *Shirataka* who detected them with her sonar.
3. In the chart, relative locations of the units and vessels were decided based on [the data of the accurate track recorders of the *Natori* and the *Mikuma* as well as the locations where the enemy [ships] had sunk; they are considered to be close to the actual situation.
