Meeting of Two Ad Hoc-Working Groups of ISO/TC 37/ SC 1 "Principles of Terminology" in Moscow from 9 to 13 February 1981

Ad Hoc Group DP 704. — At the last TC37/SC 1 meeting in Moscow in October 1980 a resolution was passed to set up an ad hoc group for the discussion of all comments and proposals of modifications which were submitted for DP 704 (version 1980) "Principles and methods of terminology". For this ad hoc group meeting the TC 37/SC 1 Secretariat (VNIIKI) prepared a new document DP 704 (version 1981) which took into account all comments and proposals for modifications to a great extent. After long discussions a new version of DP 704 was adopted which will now be submitted to all ISO members and liaisons as ISO Draft International Strandard (DIS) for vote and comment.

Ad Hoc Group DP 1087. — At the last TC 37/SC 1 meeting in Moscow in October 1980 a resolution was passed to set up an ad-hoc-group to discuss the existent comments and proposals for modification for the revision of R 1087 "Vocabulary of terminology".

For this ad hoc group meeting, the TC 37 Secretariat prepared a document listing the concepts concerning "concepts, definitions and terms" as well as "dictionaries and vocabularies", which were proposed for inclusion in the new standard "Vocabulary of terminology". This document was discussed and a selection of concepts was made from a section of the document.

Overview of Infoterm's activities in 1980

The main emphasis of the activities of Infoterm in the last year lay in the following fields:
— working out plans and operational models for the international network of terminology, TermNet
— preparation of a draft of a TermNet manual (for recording bibliographical and organizational data)
— preparing a study on terminological data elements
— preparatory work for the recording of terminologies in machine-readable form
— systematizing its information and advisory services
— editing the volumes 5 and 6 of Infoterm Series
— preparing working materials for terminology teaching and training
— preparing documents for courses, lectures and meetings.

In September 1980 Infoterm convened an international symposium for experts on terminological data elements which worked out 9 recommendations on this subject. In November 1980 there was a meeting of the "Union des Associations Techniques Internationales" (UATI) in Vienna where Infoterm introduced its plans for TermNet and the recording of terminologies in machine-readable form.

Infoterm's advisory services have been used by many institutions and specialists from all over the world. Infoterm acted also as host for numerous experts who came to visit its offices and archives. Some 600 letters were sent out by Infoterm last year in reply to various requests for detailed information concerning the theory of terminology and practical aspects. This information was supplied in form of material and documents which added up to thousands of pages a year. The number of entries recorded for bibliographies has increased and is now up to 5,000 per year.
