

Martín Fonck
Subterranean Explorations

EnvironmentalAnthropology | Volume 9

Editorial

The series **EnvironmentalAnthropology** publishes studies that are based on ethnographic methods, reflect emic perspectives and contribute to environmental theory building. The series is based on a broad concept of the environment, which includes both the social, human-made and the “natural” environment. With this broad thematic scope, the series maps the diversity of culturally specific lifeworlds and practices worldwide. The series also aims at bringing together ethnological studies with an environmental focus and to promoting dialogue within interdisciplinary and international debates. In this way, the writings published in **EnvironmentalAnthropology** make unique contributions to pressing environmental issues of the present day.

The series is edited by Eveline Dürr, Frank Heidemann, Oliver D. Liebig and Martin Sökefeld.

Martín Fonck is a postdoctoral researcher and lecturer at the Department of Science, Technology and Society (STS), TUM School of Social Sciences and Technology. He completed his PhD at the Rachel Carson Center for Environment and Society and the Institute of Social and Cultural Anthropology at the University of Munich. He investigates debates on the futures of environmental technologies from an ethnographic and historical perspective.
