

Acknowledgments

This volume is the result of a fruitful collaboration between the SoSciBio research group (short for Human Diversity in the New Life Sciences: Social and Scientific Effects of Biological Differentiations) and Jenny Reardon (University of California, Santa Cruz), as well as Veronika Lipphardt (University College Freiburg). Comprising Isabelle Bartram, Nils Ellebrecht, Andrea zur Nieden, Tino Plümecke, Laura Schnieder, Isabel Schön, and the research assistants Felix Fink, Lukas Geisthardt, Levin Nikolai, Christoph Panzer, Hannah Schönberger, Charlotte Schulze-Marmeling, Paula Steinbrenner, Anika Troitzsch, Dominik Weber, and Jan Weber, SoSciBio was funded by the German Federal Ministry of Education and Research (BMBF, grant number 01GP1790) at the Institute of Sociology at the University of Freiburg, Germany. The scientific exchanges and networks that emerged through international workshops and panels culminated in this selection of articles.

We extend our heartfelt gratitude to the distinguished reviewers of the chapters in this volume, whose critical insights, thoughtful feedback, and analytically engaging commentaries have significantly enhanced the quality of the contributions. We are especially grateful to Mita Banerjee, Susanne Bauer, Catherine Bliss, Mathias Bös, Cornelia Brink, Elise Burton, Simon Cole, Inga Diederich, Joan Fujimura, Michael Guggenheim, Sibille Merz, Marion Müller, Aaron Panofsky, Ramya Rajagopalan, Katharina Schramm, Andrew Smart, Victor Toom, Sandra Widmer, Matthias Wienroth, and Henri-Michel Yéré for their careful readings, constructive critiques, and valuable suggestions, which have enriched each chapter and greatly contributed to the coherence of the volume as a whole. Special thanks go to Michael Thomas Taylor, who not only edited all the texts for clarity and correctness but also made many suggestions for improving the argumentation.
