

Acknowledgements

First of all, we would like to thank our authors for the wonderful contributions and discussions as well as our student assistants very much for their support in the realization of this book: Julia Herbach for her assistance with the organization of the “Beyond Quantity” conference, the coordination and editing of the book’s contributions, as well as the book’s cover design; Liana Popa for the coordination, and especially the extensive linguistic editing of all contributions to this book; Jeffrey Röchling for his assistance during the review process and the editing of the book’s contributions. We also very much appreciate the work of many of our colleagues for providing reviews and/or feedback for this collection. Further thanks go to our publisher transcript, in particular to Johanna Mittelgöcker, as editor of this publication, to Dagmar Buchwald, as well as to Anna Tuschling and Bernhard Dotzler, the editors of the series “AI Critique”.

This book publication is part of the research group “How is AI Changing Science? Research in the Era of Learning Algorithms” (HiAICS), which has been generously funded by the Volkswagen Foundation since 2022 (planning grant since 2019).

Finally, we would like to thank the Sorbonne Center of Artificial Intelligence, especially Gérard Biau, Xavier Fresquet and Nora Roger, for being such wonderful hosts to the opening conference of the HiAICS research group.
