List of Figures	9
List of Tables	11
Summary of the book	13
1 Introduction	17
2 Scenario planning: characteristics and current issues	27
2.1 Scenarios and scenario development	28
2.1.1 Core characteristics of scenarios	28
2.1.2 Methodological choices in scenario planning	30
2.2 Evaluative research: scenario objectives and evidence.....	35
2.2.1 Objectives of scenarios.....	36
2.2.2 Effects and effectiveness of scenarios	39
2.2.3 The 'users' of scenarios	42
2.3 Two exemplary scenario planning methods	45
2.3.1 Intuitive Logics	46
2.3.2 Cross-Impact Balance Analysis	48
2.3.3 A comparison of both methods.....	50
3 Scenario plausibility: emerging debates in research and practice	57
3.1 The value of plausibility for scenario planning	58
3.2 Excursus: probability and judgment under uncertainty	61
3.3 Operationalising and assessing scenario plausibility	68
3.4 Critical reflections on scenario plausibility	70

4	Conceptual explorations: plausibility across disciplines	73
4.1	Framework for exploration: the life path of scenarios	74
4.2	Plausible reasoning in informal logic and argumentation theory	78
4.2.1	A theory of plausible reasoning	80
4.2.2	Plausibility in argumentative discourse analysis	84
4.2.3	Relevance for scenario plausibility	88
4.3	Plausibility in narrative theory	90
4.3.1	Structural and cultural theory approaches to plausibility	91
4.3.2	Reader-oriented approaches to plausibility	95
4.3.3	Relevance for scenario plausibility	98
4.4	Plausibility judgments in cognitive and educational psychology	100
4.4.1	Models-of-data theory	101
4.4.2	Plausibility Analysis Model (PAM)	102
4.4.3	Plausibility Judgment in Conceptual Change Framework (PJCC)	103
4.4.4	Relevance for scenario plausibility	107
4.5	Directions and propositions for empirical research	109
5	Empirical research: Methodology to study scenario plausibility	117
5.1	Experimental structure	119
5.2	Experimental material	121
5.3	Procedures and data collection	125
5.4	Considerations of the study's validity	132
6	Experimental study: quantitative research findings	137
6.1	Statistical tests for data analysis	137
6.2	Experimental sample and treatment groups	140
6.3	Differences in scenario plausibility judgments	142
6.4	Plausibility, credibility and trustworthiness	152
6.5	Plausibility, participants' own beliefs and perceptions of data	157
6.6	Plausibility, participants' cognitive styles and heuristics	164
7	Experimental study: qualitative research findings	171
7.1	Procedure of qualitative data analysis	171
7.2	Internal structure of scenarios	173
7.3	Scenario's relation to other forms of knowledge and data	179
7.4	Scenario methodology	183
7.5	Discussion and data triangulation	188

8	Synthesis: A conceptual map of scenario plausibility	193
8.1	Units and contexts of the map	193
8.2	Unit of analysis A: scenario development sources and methods	195
8.2.1	Indicator 1: credibility	195
8.2.2	Indicator 2: scenario methods	200
8.3	Unit of analysis B: scenario(s) and scenario report	204
8.3.1	Indicator 3: internal structures of scenarios	204
8.4	Unit of analysis C: scenario user-recipient	209
8.4.1	Indicator 4: conceptual coherence	209
8.4.2	Indicator 5: cognitive heuristics and dispositions	211
9	Conclusions and outlook	215
9.1	Implications for research and practice	215
9.2	Critical review of the research process	219
9.3	Suggestions for further research	220
	Abbreviations	225
	Acknowledgments	227
	References	229
