As every reader of our current bibliography on Classification Literature in International Classification will have noticed, the subject access of this index follows the outline of the bibliography. Although the single research projects have been classed more deeply and are also retrievable more specificly, we considered it more helpful to provide a survey-type access, however, by retaining the full context through the title of a project. Anybody who would like to comment on this is invited to send pertinent remarks to I.Dahlberg, Woogstr.36a, D-6000 Frankfurt/Main.

This service was not supported by any agency. It was initiated out of sheer interest and love for our field of study. Anybody who misses indications of research should please consider that we kept inviting to let us know of ongoing research projects, however, that we could only cover what we received, mostly through the published services mentioned.
