# SOCIAL ANALYSIS

## The International Journal of Cultural and Social Practice

Editor-in-chief: **Martin Holbraad**  
*University College London*

*Social Analysis* has long been at the forefront of anthropology's engagement with the humanities and other social sciences. In forming a critical, concerned, and empirical perspective, this journal encourages contributions that break away from the disciplinary bounds of anthropology and suggest innovative ways of challenging hegemonic paradigms through 'grounded theory,' analysis based in original empirical research.

The journal invites contributions directed toward a critical and theoretical understanding of cultural, political, and social processes. It is available for the publication of information and discussion by active ethnographic researchers into the forces involved in the production of human suffering, poverty, prejudice, war, and violence.
