Inhalt/Content

Seite/Page

Preface 1

Plenum / Plenary Lectures

<i>O. Eriguchi</i>	SUBARU CVT toward 2020	3
<i>A. Albers, S. Ott, N. Bursac, S. Rapp</i>	Product generation engineering – Efficient and effective to innovative drivetrain solutions	17
<i>W. Reik, R. Seebacher</i>	The history of dual mass flywheel development – Success factors and hurdles	33

DKG/DCT

<i>K. Fronius, A. Harsch, P. Neuwirth, J. Gindele</i>	The AMG SPEEDSHIFT DCT from the Mercedes-Benz 7G-DCT family – Performance for the road and race track in the compact segment	53
<i>M. Funk, G. Bofinger, J. Patzer, D. O. Lautenschlager, E. Granderath</i>	The new Porsche dual clutch gearbox (PDK) – An important component of the powertrain of the future	69
<i>B. Löffler, J. Patzner, M. Drabek, K. Armbruster</i>	Modular 8-speed hybrid dual clutch transmission with integrated all-wheel distributor by ZF	85
<i>R. Nasdal, U. Bernhardt</i>	Cascaded gears: Possible applications and experiences	101

Automatische Aktuierung / By wire systems

<i>M. Hochrein, F. Mühlfeld, J. Buhl</i>	CBW system by ZF – Maximum efficiency with maximum acceptance	109
<i>R. Welter, M. Kneißler, M. Hausner, D. Schulteis</i>	The fascination of Clutch-by-Wire	121
<i>F. Brezger, A. Moser</i>	Energy saving potentials by advanced functionalities of clutch or brake actuator systems for vehicle drivetrains	137

Konzepte/Concepts

<i>B. Kluge</i>	Systematic approach to generate multi-mode-transmissions – Method to evaluate the potential of multi-mode-transmissions	157
<i>J. Willert, C. Bündler</i>	Modular and scalable approaches in layshaft transmission design	167
<i>M. Kraft, W. Pflieger, S. Henzler, C. Nizzola, S. Rinderknecht</i>	Simulation-based study of drivetrain electrification to improve driving dynamics	177
<i>D. Kupka, P. Tenberge</i>	Automated concept design for the evaluation of favourable AT structures	193

Schaltelemente / Shift elements

<i>M. Spreckels, U. Christoffer</i>	Efficient synchronizer for comfort and performance increase of manual and dual clutch transmissions	207
<i>O. Back, A. Damm, P. Echtler</i>	Clutches with positive fit for automatic transmissions	221

<i>J. Utz, V. Lichtenwald, G. Hirt</i>	Short Synchro (STSS) – reduced shift travel for MT's and DCT's – Development of a synchronizer system for future demands in transmissions	231
--	---	-----

Komponenten / Components

<i>C. Ott, S. Eisenhuth, F. Jonas, T. Hofmann</i>	New generation of hydraulic control modules with integrated pressure sensors for transmission control	243
<i>A. Kooy, D. Eireiner, T. Krause, C. Herbers, B. Vögtle</i>	Torsional damping systems for all relevant powertrains – Extending current damping technologies	257
<i>C. Fouret</i>	Fatigue strength of pendulum components in dual mass flywheel VDI 2016	271
<i>T. M. Wolf</i>	Optimizing the gearbox efficiency rate by rolling bearings – Six speed manual transmission for front wheel drive cars	281

Methodik / Methods

<i>W. Geis-Drescher</i>	Challenging flexibility in transmission production	297
<i>R. Moehlmann</i>	Modular design for driveline mechatronic systems – Global development strategy driven by automotive market demands in the context of global competition	309
<i>U. Reichert, A. Albers, S. Ott, A. Radimersky</i>	Software supported development of a battery electric vehicle powertrain considering the efficiency	321

Antriebsstrang/Drivetrain

<i>M. Maisch, M. Homm, U.Keller</i>	The highly efficient 9GH-Tronic plug-in hybrid transmission by Mercedes-Benz	339
<i>S. Heller, S. Heppel</i>	The new BMW hybrid powertrain with eight speed hybrid module	353
<i>R. Kronstorfer, F. Kolb, U. Pinschmidt</i>	Audi quattro – Four wheel drive becomes more efficient	369

Automatikgetriebe/Automatic transmission

<i>W. Hinz, G. Bednarek</i>	The new 8-speed FWD automatic transmission for General Motors / A. Opel AG	383
<i>M. Seeberger, P. Leipold, R. Schmelzer</i>	8-speed transmission development for motorsport application	397

Simulation/Simulation

<i>A. Lampe, U. Mettin, R. Serway</i>	Clutch control of stepped automatic transmissions by using a virtual DCT-structure – Power shifts made easy with generic control software	405
<i>M. Jordan, P. Tenberge</i>	Optimized start-stop-control of a P2-hybrid – Identification of critical parameters for comfort and timing	421

NVH/NVH

<i>Y. Takeda, M. Kawaminami, M. Tsuchida, H. Takekawa</i>	Gear whine noise reduction technology of new model transmission for FF-Hybrid Vehicle	435
---	---	-----

<i>B. Kohn, M. Otto, K. Stahl</i>	Noise reduction potential of waveform flank modifications – Topological waveform and waveform-like modifications provide promising optimization perspectives	451
<i>J. Kniel, A. Albers, S. Ott, B. Lorentz, M. Eisele</i>	A new approach for higher first gear ratios by increasing the clutch performance using fiber sensing technology	469

Leichtbau / Lightweight

<i>H.-W. Raedt, F. Wilke, C.-S. Ernst</i>	Lightweight design in transmission by forging technology in passenger cars and light commercial vehicles	485
<i>P. Gwinner, M. Otto, K. Stahl</i>	Torque-vectoring transmission with reinforced plastic housing for an electric subcompact vehicle – Measures to integrate a plastic housing into an e-drive transmission	503
<i>S. Foulard, S. Rinderknecht, R. Fietzek</i>	Paradigm change in transmission design by online condition prediction – Cost-efficient and resource-optimized lightweight design based on the eLIFE and ecoLIFE ³ concepts	515

Software-Simulation / Software simulation

<i>P. Maurel, B. Bradaï, T. Heitzmann, R. Randriazanam- parany, D. Taccoen, V. Picron</i>	Entry Mated [®] : An automated vehicle traffic jam assist function for three pedals entry cars	531
---	---	-----

<i>R. König, A. Viehmann, S. Rinderknecht</i>	Development of the transmission control for a high-speed multi-gear powertrain concept for electric vehicles	543
<i>F. Pflüger</i>	Virtual calibration of conventional & hybrid drivetrain strategy – Transfer drive strategy calibration from vehicle in a virtual environment	563

4. Internationale VDI-Konferenz / 4th International VDI Conference Getriebe in mobilen Arbeitsmaschinen / Transmissions in mobile machines

Legislative Vorgaben / Legislation

<i>L. Frerichs</i>	Voluntary commitment of the agricultural and construction machinery manufacturer – Continuous efficiency increase to reduce fuel consumption and CO ₂ emissions	577
--------------------	--	-----

Aktuelle Getriebekonzepte / Transmission concepts

<i>M. Graf, M. Brenninger, R. Heindl</i>	CVDT – advanced hydrostatic power-split drivetrain – The next level in tractor transmission technology	587
--	--	-----

Aktuelle Getriebekonzepte / Transmission concepts

<i>G. Miller, W. Rebholz, R. Morrison</i>	Introduction of cPower for Skidders	589
<i>D. J. Franco, L. Dalla Palma, P. Rossi, F. Panizzolo</i>	HVT high dynamics and power management strategies for wheel loader application	595

<i>G. Jacobs, F. Straßburger, C. Pelger</i>	Power split drives with mechanical variators for small mobile machines	605
<i>J. Furmaniak</i>	Gearbox technology in a state of the art header drive for a combine harvester (in combination with belt drives)	615

Systeme mit elektrischen Antrieben (1) / Systems with electric drives (1)

<i>D. Jünemann, M. Eghtessad</i>	Evaluation of electric working drives in agricultural machines	617
<i>G. Stempfer</i>	System optimization through electrification in agricultural – (and construction-) machinery – How to find goal oriented way of electrification?	627

Komponenten und Subsysteme / Components and subsystems

<i>F. Markowsky</i>	Efficient friction – Use of modern tools in friction system development	637
<i>M. Weigel, U. Hafner, R. Mauch</i>	Advanced oil level switch technology for mobile equipment	645
<i>P. Shepherd</i>	Optimised flow control for lubrication and actuation of medium and heavy duty transmission applications – Concentric variable flow transmission charge pump	655
<i>J. Winchester, A. Favale, S. A. Martin</i>	Lightweight, highly efficient drive system	667

Systeme mit elektrischen Antrieben (2) / Systems with electric drive (2)

<i>M. Hammer, W. Klinger</i>	ZF electrification in agricultural machinery systems	681
<i>P. Heuvelman, C. Christ, D. Ried</i>	Design of diesel electric propulsion systems in off-highway applications	689
<i>P. Rieder</i>	Investigations to improve the efficiency of highly integrated electrical drive units for industrial truck applications –The forklift-truck story	699
<i>O. Neuf</i>	A chain is as strong as the weakest part	701

Systems Engineering

<i>V. Warth, B. Reick, B. Bertsche, M. Geimer</i>	Efficient analysis of complex continuously variable power split transmissions with multiple in- and outputs	719
<i>D. Engelmann, W. Müller, M. Geimer</i>	Project “Line Traction 3” – Mechanical driveline with active wheel hubs	731
<i>M. Ribaldone, F. Galli, S. Dominoni, S. Tremolada</i>	Development of an innovative suspension and traction system for compact tractor	743

International VDI-Conference CVT in automotive applications

R. Hiraku Technologies need to have more flexibility 757

Drive system

G. Hellenbroich,
P. Janssen,
I. Steinberg CVT in comparison to other transmission concepts –
Fuel consumption in state-of-the-art B-class vehicles 767

**Transmission
Concepts – Methods**

M. Oguri,
H. Itou,
N. Akiyama Enhanced performance of next generation
LINEARTRONIC® 777

A. Teubert How to build better CVTs 791

A. Pigéard,
S. Strauss,
T. van Dongen,
L. Römers Start/Stop Coasting and CVT – An effective, customer
perceivable and attractive fuel-saving combination 805

A. Yildiz,
A. Piccininni,
F. Bottiglione,
G. Carbone Testing the CMM model of chain-CVT transmissions in
steady-state and shifting conditions 817

C. Lauinger,
A. Götz,
B. Walter,
M. Finsterbusch,
E. Simon CVT Hybrid – Low emission, high performance 827

Components**Actuators – Clutches and torque converters – Materials - Tribology**

K. Kato	Development of hydraulic control system for JATCO new wide-range CVT	847
<i>L. Marquenie, T.T.G. Clephas, J.H.M. van Rooij</i>	Development of an improved electro-hydraulic CVT actuator	859
<i>S. Fujimoto, N. Shiomura, K. Sato, Y. Kawahara</i>	The trend and future of torque converter for CVT	869
<i>S. A. Pahlovy, S. F. Mahmud, M. Kubota, M. Ogawa, N. Takakura</i>	Improvement of transmission efficiency by reducing the drag torque in disengaged wet clutch – Development of a model for calculating drag torque or spin loss of disengaged wet clutch of transmission	879
<i>B. Pennings,</i>	Recent material developments for further optimization of pushbelt CVT power density	897
<i>A. Albers, K. Bause, S. Ott, S. Reichert, M. Behrendt, U. Reichert</i>	Tribosystemic view of CVT in drive systems – Getting tribological mechanisms in CVT under control	905
<i>J.-N. Mach, G. Poll</i>	Influence of surface structures on the operational behavior of continuously variable transmissions	919

Alternative continuous variable concepts for automotive and automotive-related applications

<i>G. McIndoe, E. Taskiran</i>	CVT powerpath solutions using variglide continuously variable planetary for maximum fuel economy	921
<i>H.-D. Schneider, R. Rompelberg</i>	The cone-ring-transmission will go into production!	931
<i>J. W. E. Fuller, C. J. Gaskell</i>	High efficiency “full-toroidal” traction drive CVT; technology improvements and application to front wheel drive cars	941

Peer Reviewed

<i>M. Kraft, W. Pflieger, S. Henzler, C. Nizzola, S. Rinderknecht</i>	Simulation-based study of drivetrain electrification to improve driving dynamics	177
<i>B. Kohn, M. Otto, K. Stahl</i>	Noise reduction potential of waveform flank modifications – Topological waveform and waveform-like modifications provide promising optimization perspectives	451
<i>S. Foulard, S. Rinderknecht, R. Fietzek</i>	Paradigm change in transmission design by online condition prediction – Cost-efficient and resource-optimized lightweight design based on the eLIFE and ecoLIFE ³ concepts	515
<i>D. Engelmann, W. Müller, M. Geimer</i>	Project “Line Traction 3” – Mechanical driveline with active wheel hubs	731
