Plenary Lectures

<i>C. Ebert,</i> <i>D. Lieckfeldt</i>	Risk-oriented security	1
--	------------------------	---

Dual Clutch Transmission

<i>H. Gröhlich,</i> <i>D. Germershausen</i>	DQ381 – The latest generation of dual-clutch transmissions from Volkswagen	3
<i>M. Bahne,</i> <i>U. Frey</i>	CO ₂ potentials of DCTS – competition benchmark and technology outlook	5
<i>G. Hellenbroich,</i> <i>I. Steinberg,</i> <i>D. Freiholtz</i>	Efficient and industrialized dual clutch transmission family for powertrains up to 350 Nm	7
<i>C. Wirth,</i> <i>A. Garcia</i>	AT or DCT? MCT – The best of both worlds! Synthesis and functionalities of multi-clutch transmissions	9

Hybrid Transmissions

<i>M. Grumbach</i>	Advancement in transmission- and hybrid technology to meet future market conditions	11
<i>F. Casimir</i>	A modular concept for hybridized manual transmissions	13
<i>S. Herber</i>	PHEVplus – Efficiency-raising DHT* for plug-in hybrid applications	15

Hybrid Concepts

<i>M. Horn, U. Griesmeier, B. Vahlensieck</i>	New concepts for plug-in hybrid and parallel range-extender transmissions – The next big step of powertrain electrification	17
<i>C. Danzer, J. Liebold, E. Schreiterer, J. Mueller</i>	Modular low-cost powertrain platform for HEV and EV	19
<i>T. Seidel, A. Lange, F. Küçükay</i>	DHT concepts based on DCT design	21

48V Hybrid

<i>O. Coppin</i>	12+12V and 12+48V hybridization: A modular approach and transmission impacts – Enhancing low voltage hybridization road map	23
<i>R. Tull de Salis, J. Forssell, T. Stalfors</i>	A 48-400V Off-Axis P2 hybrid module with minimal impact on powertrain length – Joint development between Volvo cars and BorgWarner	25
<i>D. Reitz, A. Englisch, T. Eckenfels</i>	The 48 V P2 hybrid – More than a bridging technology	27

Components

<i>K. Kanto, T. Yamada</i>	Non-contact profile measurement machine – Better insight into complex gear shapes with dense 3D scans	29
<i>G. Goch, Y. Peng, K. Ni, A. Günther</i>	Optical and areal measurements and evaluations of cylindrical gears	31

		Page
<i>J. Maas, C. Hegger</i>	Development of MRF coupling elements for dedicated hybrid transmission	33
<i>A. Tissot, T. Bosse, D. Heße</i>	Analytical process and KLT generation based on a manual transmission dry clutch system	35
 Virtual Engineering		
<i>T. Pham, C. Scholz, G. Bofinger, R. Seifried</i>	Driveline control – Intelligent actuator inputs to improve component protection, performance and comfort	37
<i>J. Müller, J. Liebold, C. Danzer</i>	From customer requirements to the optimal hybrid powertrain – High-performance hybrid transmission for future plug-in hybrid drives	39
<i>M. Hein, C. Kunze, J.-K. Lee, T. Tobie, K. Stahl</i>	Customer-focused modular test procedure for driveline components	41
 Plenary Lectures		
<i>P. Moelgg</i>	Technological conversion of the automotive drivetrain – electrification as the key to success	43

Hybrid Transmission

<p><i>K. Kato,</i> <i>Y. Suzuki,</i> <i>A. Nishimine,</i> <i>S. Suenaga,</i> <i>K. Shimayabu,</i> <i>M. Tsuchida,</i> <i>S. Baba,</i> <i>T. Miyazaki</i></p>	<p>Development of new plug-in hybrid transaxle for compact-class vehicles – Dual motor drive system</p>	45
<p><i>M. Weibring,</i> <i>D. Kupka,</i> <i>M. Jordan,</i> <i>P. Tenberge</i></p>	<p>Compact 6-speed hybrid transmission for front-transverse applications with 450Nm</p>	47
<p><i>P. Janssen,</i> <i>Y. Zhang</i></p>	<p>Full hybrid planetary transmission with on demand actuation – FEV’s newest member of the PREX transmission family</p>	49

Electrified Drivetrain

<p><i>R. Jäger,</i> <i>P. Ramminger,</i> <i>R. Matthé,</i> <i>M. Herrmann</i></p>	<p>The electric propulsion system in the new Opel Ampera-e</p>	51
<p><i>M. A. Schermann</i></p>	<p>Highly integrated eDrives – Technology and outlook</p>	53
<p><i>T. Pfund,</i> <i>T. Biermann,</i> <i>M. Gramann</i></p>	<p>Electric axle drives – Scalable propulsion system for electrified powertrains</p>	55
<p><i>S. Jeschke,</i> <i>M. Maarleveld,</i> <i>J. Bärenfänger</i></p>	<p>EMC of highvolt traction systems – Typical disturbance pulses, new measurement setups and their practical realization</p>	57

Automatic Transmission / CVT

<i>S. Reisen, W. Novak, M. Burgbacher, M. Stockmeier, T. Kernstock</i>	The new AMG SPEEDSHIFT MCT 9-speed sports transmission from the Mercedes-Benz automatic transmission family	59
<i>F. van der Sluis, S. Yildiz, A. Brandsma, P. Veltmans, M. Kunze</i>	The CVT pushbelt reinvented for future compact and efficient powertrains	61
<i>N. Ikeda,</i>	Development of a new torque converter clutch control using Engine-CVT harmonized control	63

Manual Transmission

<i>U. Reichert, A. Albers, K. Wolter, T. Pinner, S. Ott</i>	A new approach for the investigation of synchronizations by different shifting characteristics	65
<i>I. Greiter, W. Leska</i>	Reducing CO ₂ emissions by way of injection lubrication on manual gearboxes MLxx2	67
<i>U. Kretzschmar, D. Heck</i>	The new small 5-/6-speed manual transmission of GM China	69
<i>A. Weidler, H. Beitler, S. Lessi, U. Keller</i>	Clutch protection function – Clutch design one size smaller!?	71

Hybrid Concepts

<i>A. Sturm, D. Förster, F. Küçükay</i>	Plug-in hybrid electric vehicle powertrain dimensioning under consideration of emission reduction targets, powertrain cost and modularity	73
<i>K. Muehlbauer, D. Schoeneberger, R. Pohlmann, W. Hackmann, H.-P. Feustel, E. Achleitner, M. Schweizer-Berberich, C. Schmidt, S. Rinderknecht</i>	Low cost plug-in powertrain – Plug-in for the mass market	75
<i>M. Jordan, D. Kupka, P. Tenberge</i>	Control of e-motor-assisted shiftings in dedicated hybrid transmissions	77

NVH

<i>S. Ebina, Y. Asaoka, T. Kusada, T. Hyakutake</i>	NVH optimization of a transmission oil pump	79
<i>P. Gwinner, M. Otto, K. Stahl</i>	Vibration behaviour of high-speed gearings for electrically driven powertrains	81
<i>M. Theobalt, H. Mahe, C. Lopez Perez</i>	3 cylinders and cylinder deactivation: which dampening challenges?	83

5th International Conference Transmissions in Commercial Vehicles 2017

Concepts for conventional drivetrains

<i>C. Anh Tran</i>	Logistics 4.0 – Vision und Herausforderungen	87
<i>M. Lamke, C. Röchardt, M. Raeder</i>	ZF TraXon transmission system: Paths into the future	89
<i>J. Müller, R. Resch, E. Schreiterer</i>	Development of highly functional dual-clutch transmissions for future commercial vehicles	91
<i>F. Sauter, H. Mozer, B. Fessler, J. Glückler</i>	Development of an 8-speed automatic transmission for medium-duty trucks and buses – Market analysis, selection, detailed definition and comparison of concepts and rollout of a segment-optimized transmission system	93

Components for an optimized powertrain design

<i>S. Gaudé, L. Lefolle, C. Derville-Helluin</i>	Clutch NVH performance to answer engine down speeding trends	95
<i>M. Sannelius</i>	Disengageable retarder – The only way to completely avoid the slip losses	97
<i>U. Clausen</i>	The last mile – Findings of the ZF future study 2016 about last mile logistics	99

Concepts for electrified drivetrains

<i>G. von Esebeck, T. Pflanz</i>	Application on e-Mobility in commercial vehicle	101
<i>J. Tochtermann</i>	Integrated electric axle for trucks	103

Intelligent powertrain management

<i>K. Neiß</i>	Driveline electrification in commercial vehicles – Combustion powered long-haul & electric driven distribution	105
<i>F. Roos, O. Flårdh</i>	The next generation active prediction based powertrain control strategies – Utilizing the vehicle's kinetic energy as energy storage	107
<i>R. Böhme</i>	The basis for overall connectivity within heterogeneous logistics industry: A new platform – How RIO improves B2B processes, costs and margins	109

Challenges in manufacturing

<i>A. Flodin</i>	Light weight design, manufacture and test results of powder metal gear transmissions	111
<i>U. Beste</i>	Additive manufacturing of high strength wear resistant materials – -3D-printed metals gives new possibilities	113

3rd International Conference Control Solutions for Transmissions 2017

<i>L. Eckstein, M. Crampen</i>	Electrified and connected – Opportunities for future drivetrain architectures	117
------------------------------------	---	-----

Innovative drivetrain architectures and control strategies

<i>T. Buchberger</i>	Bond graphs and transmission output torque control during gearshift – Improved shift quality and reduced calibration effort for automatic transmission control using bond graphs	119
<i>M. Ishihara</i>	Comparison of P2 hybrid DCT actuation control system – An evaluation of integration complexity, energy consumption and cost	121
<i>M. Weiss, T. Witzemann</i>	Flexible electronics integration platform for future transmission applications	123

Actuators – Efficiency of auxiliary units

<i>A. Reul, R. König, S. Rinderknecht,</i>	Overall optimization of electrodynamic shifting systems – Optimization and improvement of the electrical path, mechanical path and control by a new development approach	125
<i>R. Taylor</i>	Novel actuation and control for a multi-speed powershifting transmission for electrified vehicle – Direct acting electromechanical gear engagement angular engagement dog position control	127

Innovative actuator- and sensorsystems

<i>M. Ruider, M. Heiertz, J. Winkler</i>	Innovative dog clutch actuator with integrated sensor function for 48V ZF hybrid drives	129
<i>A. Kless</i>	Innovative measurement and calibration solution for Transmission ECU's	131

Efficient use of simulation and software for transmission control

<i>C. Gühmann, H. Huang, R. Knoblich</i>	Modelling, simulation and optimisation in the development of transmission control units	133
<i>A. Uhle</i>	Actuation synthesis for new hybrid transmission application (DHT)	135
<i>M. Bhai, X. Shen</i>	Design of a hybrid mode and shift coordinator [hmsc] for the central control software of a range extender powertrain	137

BEV and HEV in the context of transmission control

<i>W. Galli, J. Bast, O. Eksi</i>	The Audi 48V mild hybrid – System integration with maximum customer benefit	139
<i>M. Falco</i>	Influence of electric drive systems and their control on the NVH behavior of hybrid and electric vehicles	141
<i>H.-P. Feustel</i>	Power electronics for electric drives in power train applications	143
<i>A. Lampe, U. Mettin</i>	Generic control approach for multimode-hybrid transmissions – Using a virtual dual clutch framework	145
