

## Acknowledgements

I was born in a society where the fact of having a physical, mental or sensory impairment was synonym to uselessness and considered god's punishment. How bitter it was for me as a child to realize that I belong to this minority. The long chain of 'repair' efforts, societal rejection and structural discrimination were unable to diminish my profound believe in equal rights of Disabled persons (hereinafter referred as DPs). Rather they strengthened my resolution to dissolve historic discrimination through the examination of legal norms, actors and processes of the states that prevent or ensure the implementation, promotion and protection of equal rights of DPs.

The wish of conducting multi-level cross-country study could be realized through the PROMI- Project funded by the Federal Ministry of Labour and Social Affairs, as well as the financial support of the University of Kassel.

For the successful completion of my doctoral dissertation, I am deeply indebted to my supervisor Prof. Dr. iur. Felix Welti, whose unparalleled academic advice, invaluable professional guidance, unwavering support and commitment created an ideal and equal academic environment.

Deep appreciation should be extended also to Prof. Dr. Sabine Ruß-Sattar for her constructive guidance and valuable advice in the field of political science.

Next, I express my sincere gratitude to the head of the institute of Civil Law at the University of Innsbruck, Prof. Dr. Jur Michael Ganner for the opportunity and support in carrying out two-week field study at his institute.

Further thanks go to my interview partners for their time and the insights that were key to the present research work.

I am also extremely grateful to my assistants, whose devoted support during numerous national and international conferences and interviews, as well as their valuable help in making the countless books and articles accessible were instrumental for the successful completion of my doctoral project.

Many thanks also to my colleagues for their helpful questions and advice during the annual colloquia of the Department of Social and Health Care Law, Rehabilitation and Disability Law at the University of Kassel and for the nice atmosphere at the department.

## *Acknowledgements*

And last but not least, I wish to extend my deepest gratitude to my family for their support and learned ability to be proud of me as I am; to my cousin, Narine, who took care of my son during my business trips; to my son, Menua for his understanding when I could not be with him as much as I would dream of, for his profound belief in my abilities and unconditional love that served as a lighthouse on days when I was in disparity. I dedicate this work to him.
