STANDARDIZATION OF AI ETHICS

Stakeholders, Values and Profit

[transcript]

Nicholas Kluge Corrêa, Julia Maria Mönig (eds.)
Standardization of AI Ethics

Editorial

Today's rapid technological and scientific progress has unforeseeable epistemic and social side effects. An apt approach must take into account the complex dynamics of social conditions and realities associated with scientific practices of knowledge production and their implementation in technology.

The book series **Technosophy**, published at the "Center for Science and Thought" (CST) of the University of Bonn, presents interdisciplinary work from philosophy, the humanities and social sciences that contributes to wiser uses of technology, and to interpretations of cutting-edge science, both grounded in their very ontologies and epistemologies.

The series is edited by Markus Gabriel, Dennis Lehmkuhl, Aimee van Wynsberghe and Ana Ilievska. Managing editors are Christiane Schäfer and Jan Voosholz.

Nicholas Kluge Corrêa is a postdoc researcher at Universität Bonn. He received his PhD in philosophy (AI ethics) from the Pontifical Catholic University of Rio Grande do Sul (PUC-RS, Brazil) and Universität Bonn. He holds a master's degree in electrical engineering. His thesis "Dynamic Normativity: Necessary and Sufficient Conditions for Value Alignment", was awarded the Capes Doctoral Thesis Award 2025 by the Brazilian government. His main areas of research are AI ethics, AI safety, and AI alignment.

Julia Maria Mönig (Dr. phil.) is a philosopher and project manager of the philosophical part of the KI.NRW flagship project "Zertifizierte KI". She holds a PhD in philosophy from Universität Passau. At Hochschule der Medien Stuttgart, she developed ethics guidelines for highly automated driving. She also worked for the European Network of Research Ethics Committees (EUREC Office) on projects concerning ICT ethics and institutional ethics. She is a member of the Center for Ethics and Humanism at the Free University of Brussels (VUB). Her main research areas are ethics of AI, ethics of technology, privacy research and Hannah Arendt.

Contents

Series Preface

Markus Gabriel 7

Introduction

Nicholas Kluge Corrêa, Julia Maria Mönig 11

Should AI Auditors Be Audited?

Challenges and Paths for Meta-Auditing Artificial Intelligence

Marcelo Pasetti 15

Citizens Infrastructures as a Way to Govern AI's Power to Shape our Shared Representations

How to Make Sure Auditing Institutions Are Aligned with Values and Societal Expectations?

Chiara Marcoccia 39

Algorithmic Audits of HR-AI Tools in the United States

What Are HR Professionals' and Job Seekers' Perspectives?

Tina B. Lassiter, Kenneth R. Fleischmann 67

To be Cared for or Deceived?

Operationalizing Ethics in the Case of Elderly Care Robots under the European AI Act

Gaia Contu 107

Practioner's Corner

Navigating Challenges and Opportunities of Standards Developing Organizations in Times of Rapid Technological Advancement

A DIN e.V. Perspective

Dr. Maria Mensch, Adrian Seeliger, Johannes Wellhöfer143
