ISBN 978-3-18-092381-9

21st International VDI Congress
Dritev

Main topics:

Design of electric drives

Optimised mechanical components for hybrids and e-drives

Simulation and AI-supported design in development

Plenary speeches: Concepts and ideas for the automotive industry on the way to climate-neutral mobility

Concepts for conventional and electrified drives

Latest test methods for the validation of components

Expectations of the younger generations towards mobility

Content

► Drive Architecture

- Sustainable Powertrain Solutions – the new role of the powertrain at Magna**1
W. Sackl, Magna Powertrain, Lannach, Austria
- Modular transmission systems for future BEV platform applications.** 11
R. Kockisch, J. Müller, Erik Schneider, IAV GmbH
- Analysis of propulsion system architectures across vehicle segments and markets**23
J. Shetty, BorgWarner Inc, Auburn Hills, Michigan, USA;
A. Moser, BorgWarner Drivetrain Engineering GmbH, Ketsch;
D. Gajowski, BorgWarner Drivetrain Engineering GmbH, Ludwigsburg

► Electric Drive

- BorgWarner P2 Modules – from HV to 48V**35
M. Dilzer, BorgWarner Drivetrain Engineering GmbH, Ketsch

► Simulation

- Finite element approach for analyzing noise and vibration in electric drives**47
A. Fröhlicke, M. Felbermaier, A. Britten, P. Fietkau, Dr. Ing. h.c. F. Porsche AG, Weissach
- Thermal Simulation according to Maturity Level in E-Drive Development**61
R. R. Kasibhatla, P. Neidhardt, K. Caliskan, ZF Friedrichshafen AG, Schweinfurt
- Advanced Design of Dedicated Hybrid Drivetrains**77
M. Giannantonio, S. Henzler, Mercedes-Benz AG, Stuttgart;
S. Rinderknecht, Institute for Mechatronic Systems in Mechanical Engineering (IMS),
Technical University of Darmstadt
- Frontloading for (Hybrid-) Transmission Integration at BMW** 101
A. Ramsauer, AVL List GmbH, Graz, Austria;
A. Pujari, BMW Group, München

► E-axes and Electrified AWD

Power to the Wheels – Challenges and Benefits of Electrified AWD for EVs and Hybrid vehicles 117

S. Kaimer, Magna Powertrain GmbH & Co. KG, Lannach, Austria

TREMEC HYbrid DRive Axle – HYDRA – Hybridization enables RWD dynamics in a FWD car. 125

J. De Landtsheere, TREMEC, Zedelgem, Belgium

High Efficient 2 speed e-Axle – Highly efficient and shiftable under load. 145

C. Schmidt, H. Dhejne, AVL List GmbH, Graz, Austria;
J. Karlsson, AVL MTC Motortestcenter AB, Trollhättan, Sweden

► Hybrid Concepts

TREMEC Hybrid Dual Clutch Transmission (HDCT) – Electrification of TREMEC's high performance dual clutch transmission 159

L. de Ruijsscher, TREMEC, Zedelgem, Belgium

hofer H8-DCT-850 – High Performance Dual Clutch Transmission for transaxle application. 179

A. R. Lowis, R. Smith, A. Tauchmann, hofer powertrain

Modular and highly functional Hybrid Platform for subcompact cars up to full-size SUV 191

E. Schneider, C. Danzer, E. Schreiterer, IAV GmbH, Stollberg

► Dedicated Hybrid Transmission

Novel “Two-Drive-Transmission for Long-Range” Powertrain: Ecology and Efficiency meet Driving Comfort. 207

F. Langhammer, A. Kappes, A. Viehmann, S. Rinderknecht, Technische Universität Darmstadt

E-Axle with multi driving modes for BEV & Mild HEV P4 – The 3 in 1 e-Axle for EV requiring a wide range of driving force 229

K. Hirano, UNIVANCE Corporation, Washizu, Japan

Scaling the functionality of a DCT-based DHD to segmentspecific requirements – The new high torque DHD Plus 241

S. Idler, C. Bündler, Magna PT B.V. & Co. KG, Untergruppenbach

► Actuation Systems

- Performances Validation of an electrically-commanded dog clutch system for multi-speed and disconnectable eDrives** 255
G. Herbillon, VC ST Industrial Products, Sint-Truiden, Belgium
- Flexible Electro-hydraulic Actuation System for Multi-speed Electrified Drivetrains – Requirements and Concept** 275
A. Nees, BorgWarner Drivetrain Engineering GmbH, Ketsch
- Park by Wire System for current Electric Drive Units** 291
J. Nowack, G. Hellenbroich, A. Ghosh, V. Shapovalov, R. Fleuren, FEV Europe GmbH, Aachen
- Parking Lock Integration for Electric Axle Drives by Multi-Objective Design Optimization. . . .** 303
D. Lechleitner, M. Hofstetter, M. Hirz, Graz University of Technology, Austria;
C. Gsenger, K. Huber, Magna Powertrain GmbH & Co KG, Albersdorf-Prebuch

► Shifting Elements and Dampers

- Energy-efficient Hydraulic Control for the Multi-speed Transmission of an Electric Vehicle . .** 319
T. Hillesheim, Freudenberg Sealing Technologies, Weinheim
- The Pendulum Rocker Damper – Providing flexible damper characteristics for hybrid powertrains** 329
M. Häßler, O. Werner, Schaeffler Automotive Buehl GmbH & Co. KG, Bühl
- Modular Starting and Damping System integrated in 48V Hybrid Architectures – Efficient Starting System for Hybrid Vehicle Architectures** 347
T. Kaufhold, F. Schneider, O. Groneberg, A. Moser, BorgWarner Drivetrain Engineering GmbH, Ketsch

► **AI and Multi-Objective Optimization**

Driveability optimization of electrified powertrains utilizing machine learning based control and the interaction with ADAS/AD systems 361
X. Zhang, F. Küçükay, Institute of Automotive Engineering,
Technische Universität Braunschweig

Holistic Design of All-Wheel Drive Electric Powertrains Using a Multi-Objective Optimization Algorithm 377
B. Krüger, G. Filomeno, D. Dennin, BMW Group, Munich;
P. Tenberge, Ruhr-University, Bochum

► **Testing**

High-voltage composite test bench for component testing of battery-electric vehicles 395
S. Hönicke, K.-F. Wittwer, J. Liebold, IAV GmbH, Stollberg

Development of a method for the automated validation of the shift quality of modern dual clutch transmissions on full-vehicle test benches 399
A. Albers, M. Behrendt, Karlsruher Institut für Technologie KIT, Karlsruhe;
J. Köber, T. Breiting, Dr. Ing. h.c. F. Porsche AG, Stuttgart

Development of an innovative and modular test bench to analyse gear shifts in electrified powertrains 415
G. Gao, D. Schöneberger, S. Rinderknecht, Institute for Mechatronic Systems in Mechanical Engineering (IMS), Technical University of Darmstadt

► **Tribological Systems**

Test method A/16,6/90 with injection lubrication for discriminating different lubricants for dual-clutch transmissions. 437
M. Hein, HOERBIGER Antriebstechnik Holding GmbH, Schongau;
J. Pellkofer, K. Michaelis, T. Tobie, K. Stahl, Gear Research Centre (FZG), Technical University of Munich, Garching;
D. Kadach, AGCO GmbH, Marktoberdorf

Development of a new test method to investigate the wear behaviour of hypoid gear oils . . . 453
A. Drechsel, J. Pellkofer, K. Stahl, FZG – Forschungsstelle für Zahnräder und Getriebebau, Technical University of Munich;
J. Sandor, Technical University of Munich;
M. Hein, HOERBIGER Antriebstechnik Holding GmbH

► Construction and Design of Components

Simulation of induced axial forces on planet gear bearings at example of ZF's 8-speed automatic transmission469

S. Dussinger, T. Wiedemann, Engineering System International GmbH, Neu-Isenburg;
B. Harter, B. Wiedemann, ZF Friedrichshafen AG

Shift Elements for Electric and Hybrid Drivetrains – Shift elements with low drag losses, high actuation energy efficiency and integrated overload protection487

T. Skubacz, C. Burkhardt, S. Krischke, Diehl Metall Stiftung & Co. KG, Röthenbach

Gear Design Challenges of 2-speed-AMT High Torque E-Drives499

P. Barve, VCST Industrial Products (part of BMT Drive Solutions), Sint-Truiden, Belgium

9GH-TRONIC Plug in Hybrid Transmission Gen4 517

J. Kiesel, Mercedes Benz AG, Stuttgart

7th International VDI Conference

Drivetrain Solutions for Commercial Vehicles

October 13-14, 2021, World Conference Center Bonn (WCCB)

Image credits: ©ZF Friedrichshafen AG

► On the way to zero emission

Development trends towards CO₂-neutral powertrains for HD applications 529

M. Muether, B. Heuser, L. Virnich, FEV Europe GmbH, Aachen;
A. Guedden, RWTH Aachen University, Aachen;
T. Luediger, FEV Consulting, Aachen;
D. van der Put, FEV Group GmbH, Aachen

The outlook for E-Trucks 551

A. Panayi, RhoMotion, London, United Kingdom

Electrification of heavy commercial vehicles from the perspective of a bodybuilder 555

N. Mueller, Liebherr-Mischtechnik GmbH, Bad Schussenried

► Future of conventional powertrains

New high-performance AMT gearbox generation

P. Norberg, Scania CV AB, Södertälje, Sweden

Manuscript was not available at the time of printing.

Prediction for the service lives of drive-train units by model-based development with the measured operational conditions 561

K. Seno, Hino Motors Limited, Tokyo, Japan

Sustainable drivetrain architecture for hybrid and electric trucks 567

G. Brudeli, B. Vestgård, S. Bjørkgård, L. Bjørkhaug, Brudeli Green Mobility AS,
Hokksund, Norway

► Hybrid powertrain

MAHLE 48V Battery for Truck applications 581

P. Geskes, J. Treier, M. Moser, MAHLE Filtersysteme GmbH, Stuttgart

Hybridization – Bridging technology or the solution to keep combustion engines competitive in public transportation? A technology status with focus on mild-hybrid technology

M. Oßwald, J.M. Voith SE & Co. KG | VTA, Heidenheim, Germany

Manuscript was not available at the time of printing.

AEROFLEX – Distributed Hybrid Drivetrain for Long Haul Freight Vehicles 593

H. Wittig, Fraunhofer Institute for Transportation and Infrastructure Systems, Dresden;
J. Engasser, MAN Truck & Bus SE, München;
A. Glavinic, WABCO Vehicle Control Systems, Hannover

► E-axes

- Multi-speed e-axle for electrified heavy commercial vehicles.** 609
Z. Caba, M. Zafer, C. Harman, Ford Otosan, Istanbul, Turkey;
G. Hellenbroich, FEV Europe GmbH, Aachen;
Ö. Eyigöz, FEV Turkey
- Development of a Heavy-Duty E-Axle** 621
F. Bayer, J. Tochtermann, AVL Commercial Driveline & Tractor Engineering GmbH,
Steyr, Austria
- eTransport – Application of axle-integrated e-drive in urban LCV and MD trucks** 637
A. Bagh, D. Magnor, J. Kneiber, F. Löhe, BPW Bergische Achsen KG, Wiehl
- Advanced design of electric machines for trailers with electric axles** 653
F. Müller-Deile, ZF Commercial Vehicle Control Systems, Hannover

► BEV and fuell cell drivetrains

- Alternative drivetrains for sustainable commercial vehicles** 669
R. Resch, C. Danzer, A. Poppitz, T. Pirkl, IAV GmbH, Stollberg
- Holistic system design and operation of a fuel cell truck based on an innovative energy management** 685
C. Schörghuber, M. Ortner, J. Pell, S. Pretsch, AVL List GmbH, Steyr, Austria
- Heavy Duty Vehicles with Electric Drive Train and Hydrogen Fuel Cells as Range Extender . . .** 701
G. Sandkühler, Faun Umwelttechnik GmbH & Co. KG, Osterholz-Scharmbeck

► **E/E architecture and cyber security**

ZF E-Mobility Software Functions for Commercial Vehicles 703
D. Morgenweck, M. Großmann, W. Fakler, M. Lamke, F. Bitzer, ZF Friedrichshafen AG,
Friedrichshafen

Possibilities of a modern Powertrainmanagement 719
N. Scharlach, MAN Truck& Bus SE, Munich

OHNE PROTOTYP GEHT NICHTS IN SERIE.

Unser Podcast ist das Werkzeug, mit dem Sie Ihre Karriere in allen Phasen entwickeln – vom Studium bis zum Chefessel. Egal, ob Sie Ingenieur*in, Mechatroniker*in oder Wissenschaftler*in sind: Prototyp begleitet Sie. Alle 14 Tage hören Sie die Redaktion von INGENIEUR.de und VDI nachrichten im Gespräch mit prominenten Gästen.
